1 The following allegations are based on information and belief, unless otherwise
2 specified:

4 INTRODUCTION

5 1. No veteran entered military service severely mentally disabled and
6 homeless. We, as a people, owe our security and the preservation of our most
7 cherished values to our military service members and our veterans, who serve our
8 nation not for remuneration or glory, but out of fealty to honor, duty, and sacrifice.
9 One horrific consequence of war is that it exacts heavy and lifelong consequences on
10 the young men and women who made lofty commitments on our behalf: many return
11 suffering from physically invisible wounds of mental illness, Post Traumatic Stress
12 Disorder (PTSD), or brain traumas. For countless veterans, military service has
13 rendered them unable to resume their civilian lives, sustain their family relationships,
14 hold down jobs or continue their educations, or even to maintain a permanent
15 residence.

16 2. In March 2009, President Obama stated as to our veterans: "These
17 heroes have a home. It's the country they served, the United States of America, and
18 until we reach a day when not a single veteran sleeps on our nation's streets, our
19 work remains unfinished." But for an estimated 107,000 homeless veterans
20 nationwide, conservatively 8,200 (or 8 percent) of whom live in the Greater Los
21 Angeles area,¹ these fine words of a promised home remain aspirational rhetoric, not
22 the hard truths of their daily lives.

23 3. Many veterans who entered military service with sound bodies and
24 minds return to civilian life bearing scars both visible and invisible. The invisible
25 scars include PTSD and other mental disorders either caused or aggravated by their

26 ¹ The U.S. Department of Veterans Affairs (DVA) is the source of these estimates, which
27 are conservative and likely undercount the number of homeless veterans nationally and in the
28 Greater Los Angeles area. Numerous researchers, advocates, and local officials have argued that
DVA's estimates are inaccurately low, and other estimates place the number of homeless veterans
in Los Angeles at 20,000.

1 experiences. An incontrovertible body of research has established the close causal
2 and mutually reinforcing interrelationships between severe mental disabilities and
3 chronic homelessness. Over the past decade or more, numerous scientific studies
4 have demonstrated, consistent with common sense, that homeless individuals with
5 severe mental disorders and/or addiction disease resulting from those disorders can
6 meaningfully access and benefit from medical and mental health services only after
7 they are stabilized in stable and permanent housing connected to appropriate services
8 and support – generally referred to as “permanent supportive housing.”

9 4. In fact, research has confirmed that the only way that individuals
10 suffering from psychiatric conditions such as PTSD, brain trauma, paranoid
11 schizophrenia, and bipolar disorder consistently are able to meaningfully access and
12 benefit from medical and psychiatric services is when they first permanently reside
13 in appropriate supportive housing. Moreover, absent such housing, these conditions
14 worsen, leading to the creation of additional problems impairing the capacity of these
15 individuals to conduct everyday life. Homelessness itself exposes veterans to further
16 trauma that itself can both cause and aggravate PTSD and other disorders. For
17 veterans with severe mental disabilities incurred as a result of their service to this
18 country, effective treatment requires the stability and regularity afforded by
19 permanent housing readily accessible to ongoing comprehensive care and supportive
20 services.

21 5. The U.S. Department of Veterans Affairs (DVA) has acknowledged
22 these conclusions, stating, for example, in a supplement to a 2009 report to Congress
23 on homelessness: “For the large percentage of veterans with disabilities, permanent
24 supportive housing would be effective in helping them achieve long-term stability.”
25 Nonetheless, DVA and its constituent healthcare systems do not systematically
26 utilize permanent supportive housing to ensure that severely disabled veterans have
27 the stability and support they need to meaningfully access the medical treatment and
28 other services for which they are otherwise eligible.

6. Los Angeles is the homeless veterans capital of the United States. This is true despite the fact that the focal point for the VA Greater Los Angeles Healthcare System ("VA GLA") is the West Los Angeles Medical Center & Community Living Center campus ("WLA Campus"), a 387-acre parcel located five miles from the Pacific Ocean in Los Angeles. This land was donated in 1888 to the predecessor body to DVA for the specific purpose of establishing and permanently maintaining a soldier's home for disabled war veterans on that land. For some 80 years, DVA's predecessors operated a Pacific Branch Soldier's Home at this site in conformity with the 1888 deed, which provided a permanent home for tens of thousands of disabled veterans who resided on the campus and were able to access necessary medical and therapeutic services available there.

7. Beginning in the 1960s and 1970s, however, DVA's predecessor ceased accepting new residents at the WLA Campus, and structures dedicated to permanent housing were repurposed or fell into disuse and became badly in need of repair and renovation. All new construction and renovation projects were focused on expanding medical and short-term treatment facilities. There are today more than 100 buildings on the WLA Campus, many vacant, closed, or underutilized. In contrast to what once existed, with the exception of geriatric nursing beds, no permanent housing is available to veterans on the WLA Campus.

8. The VA GLA system, including the WLA Campus, does not provide appropriate care to all veterans, because it has been intentionally designed so that the most severely disabled veterans cannot meaningfully access the medical, mental health, and residential care services to which they are entitled under DVA's medical benefits program. Nor does VA GLA make reasonable accommodations for the disabilities suffered by these veterans so that they can access the services provided through DVA's medical benefits program on the same terms as veterans who are not disabled or who suffer different disabilities. VA GLA does not offer permanent housing for any disabled veterans on the WLA Campus, including homeless veterans

1 who suffer from severe mental disabilities or brain injuries that render them unable
2 to obtain the treatment and care they desperately need without stable housing.

3 9. Plaintiffs in this case include severely disabled veterans who suffer from
4 mental disabilities and/or brain injuries and, as a result, are homeless and cannot
5 access necessary medical and mental health treatment they require to have a chance
6 at leading the normal life that was theirs before they began military service.

7 10. Greg Valentini is an Army veteran who served in Afghanistan as part of
8 Operation Enduring Freedom (OEF) and in Iraq as part of Operation Iraqi Freedom
9 (OIF). His unit, the 101st Airborne Division, participated in the initial invasion of
10 Afghanistan in 2001 and the assault on Tora Bora intended to capture Osama bin
11 Laden and other senior al Qaeda and Taliban leaders. His unit also was part of the
12 initial invasion force in Iraq in 2003 and saw heavy combat in Karbala. While in
13 Afghanistan and Iraq, Mr. Valentini witnessed numerous fellow soldiers and
14 civilians die and was himself regularly in great peril under heavy fire. Upon his
15 return to the United States following his discharge, Mr. Valentini began experiencing
16 symptoms of what was later diagnosed as a severe case of PTSD. He was constantly
17 on alert and unable to concentrate on basic details of everyday life, he had graphic
18 nightmares about things he witnessed during his wartime service, and he began to
19 think about suicide as a way to escape the constant stress of feeling that he never left
20 the combat zone. Mr. Valentini began self-medicating himself with
21 methamphetamine to cope with the recurring violent thoughts and stress. Eventually,
22 Mr. Valentini became homeless. When he went to the WLA Campus for help, he
23 was briefly housed in a short-term treatment program, but was discharged and
24 returned to the street. He has now been sporadically homeless for several years and
25 requires a safe, secure, and stable residence in order to meaningfully access
26 necessary treatment for his mental disabilities.

27 11. Adrian Moraru is a Marine veteran who was deployed to Iraq as part of
28 the initial invasion force in OIF. While he was stationed in Karbala following the

1 initial invasion, he always had to remain "on alert" and needed eyes in the back of
2 his head, because of the constant threat he and his comrades faced. In contrast to the
3 initial invasion, when he knew who the enemy was, during this period he could not
4 interact with civilians without worrying that he would be attacked. He also was
5 exposed to a chemical without chemical warfare gear while he was in Iraq.
6 Following his discharge, he experienced a violent seizure and developed painful
7 boils on his groin, back, and arms. Mr. Moraru recalls going "schizo" when he
8 returned to his home in Philadelphia, causing him to destroy his mother's living
9 room and to have the impulse to kill her. He thereafter lived in a car for several
10 months. After other violent incidents, Mr. Moraru eventually came to Los Angeles,
11 where he was homeless and spent his days and nights marching up and down
12 Wilshire Boulevard. When he went to the WLA Campus and sought residential
13 services, he was housed at a temporary shelter in a room with three other men and
14 was discharged when he assaulted another resident. He was thereafter arrested in
15 Santa Monica and charged with making a criminal threat. As a result of his mental
16 disability, Mr. Moraru is at times overcome by strong impulses and often is not able
17 to understand why he behaves as he does. He requires a safe, secure, and stable
18 residence accessible to treatment for his mental disabilities.

19 12. Jane Doe² is an Army veteran who completed Advanced Individual
20 Training in Radio Communications at Fort Dix, New Jersey in 1974. While serving
21 in the military, she experienced several sexual assaults. VA GLA psychiatrists have
22 diagnosed Ms. Doe with PTSD secondary to military sexual trauma. She suffers
23 frequent flashbacks and nightmares and has been unable to secure or maintain a job
24 as a consequence of her mental disabilities. She has been homeless for many years.

25
26 ² Jane Doe has been the victim of several sexual assaults and is currently suffering extreme
27 PTSD symptoms, such that public disclosure of her trauma may compound and exacerbate her
28 symptoms, and she is currently seeking medical, mental health and other services and benefits from
DVA and consequently fears retaliation. For these and other reasons, a pseudonym is used to
protect her identity and to protect her from harm. Plaintiffs have filed an application seeking
permission to allow Ms. Doe to proceed under a pseudonym concurrently with this Complaint.

1 Ms. Doe requires a safe, secure, and stable residence to access appropriate treatment
2 for her mental disabilities.

3 13. Chris Romine is an Army veteran who was deployed to Iraq in 2003 as
4 part of the initial invasion force for OIF. His duties involved escorting convoys, and
5 he witnessed two close friends die during these operations. He saw one friend get
6 crushed by a vehicle and the other burn to death. Following his discharge, he had
7 difficulty adjusting to civilian life as a result of what was later diagnosed as PTSD
8 and re-enlisted in the Army. He was subsequently sent to Iraq again. In addition to
9 convoy protection and the constant heightened vigilance that it required, his unit
10 responded to roadside bomb attacks on U.S. forces, which required him to regularly
11 witness the gruesome consequences of roadside bomb attacks on U.S. soldiers. Mr.
12 Romine turned to illicit drugs to self-medicate his untreated PTSD, and, upon his
13 return to the United States following his second deployment, he became homeless
14 and lived on the streets of Santa Monica and Los Angeles. Since that time, he has
15 tried to obtain housing and services through nearly every facility available at the
16 WLA Campus, but he has not been able to obtain permanent housing. Although he
17 is currently in a transitional housing program, Mr. Romine requires a safe, secure,
18 and stable residence in order to meaningfully access necessary treatment for his
19 mental disabilities and resulting substance abuse disorder.

20 14. Plaintiffs and other similarly situated veterans are being denied
21 meaningful access to the medical, mental health, and other services offered by VA
22 GLA, solely by virtue of their disabilities, which represents unlawful discrimination
23 under Section 504 of the Rehabilitation Act of 1973. Because permanent supportive
24 housing is the only approach that consistently allows individuals like Plaintiffs who
25 suffer from serious mental disabilities meaningful access to the medical, mental
26 health, and other services to which they are entitled by virtue of their service to this
27 country, VA GLA is obligated to provide permanent supportive housing to Plaintiffs
28 and other homeless veterans suffering from serious mental disabilities as a

1 reasonable accommodation for their disabilities.

2 15. For seriously disabled veterans in the Los Angeles area, permanent
3 supportive housing is an especially reasonable accommodation because of the
4 availability of the WLA Campus, which DVA owns because private citizens donated
5 the land to DVA's predecessor in 1888 for the express purpose of establishing and
6 permanently maintaining housing for disabled veterans. The WLA campus has
7 numerous vacant and underutilized buildings that could be used specifically for that
8 purpose. Such a use would be fully consistent with the intent of the individuals who
9 donated the land to the federal government in 1888 for the purpose of establishing
10 and permanently maintaining a home for disabled veterans.

11 16. The donation of the land on which the WLA Campus now sits created a
12 charitable trust, under which DVA, as the successor trustee, is obligated to use the
13 land only for purposes that directly contribute to the public purpose for which the
14 land was donated. Although VA GLA does offer medical care and residential care
15 on the WLA Campus, it has misappropriated a substantial portion of the land for uses
16 that are in no way related to housing or caring for veterans. In lieu of the permanent
17 housing that once operated on the WLA Campus, numerous commercial and other
18 non-DVA programs now operate on the WLA Campus pursuant to leases,
19 memoranda of understanding, revocable licenses, or enhanced sharing agreements
20 entered into by VA GLA – perhaps because, according to VA GLA, the WLA
21 Campus “is perceived to be one of the most valuable parcels of real estate in the
22 western United States.” WEST LOS ANGELES VA MEDICAL CENTER, VETERANS
23 PROGRAMS ENHANCEMENT ACT OF 1998 (VPEA) DRAFT MASTER PLAN 8 (Jan. 2011)
24 [hereinafter “VA GLA MASTER PLAN”], *available at*
25 <http://www.scribd.com/doc/48127448/WLA-VA-Draft-Master-Plan>. As a result of
26 these land deals, veterans have limited access to, or are altogether prohibited from
27 accessing, approximately 110 acres of the 387-acre WLA Campus (nearly 30 percent
28 of the grounds). In fact, the current agreements render those 110 acres unavailable to

1 provide housing or otherwise expand the services offered to disabled veterans.

2 17. There has never been a public accounting of how much money VA
3 GLA receives under these land deals; who receives payments under these deals; the
4 purposes for which the revenue received, if any, has been used; or the process by
5 which these deals were negotiated. The VA GLA-approved private uses of land on
6 the WLA Campus include:

- 7 • Ten acres near the hospital are leased to Enterprise Rent-A-Car and
8 Tumbleweed Transportation, a charter bus operator, for vehicle storage and/or
9 sales;
- 10 • Sodexo Marriott operates a laundry facility and an adjacent water softening
11 unit for processing linen from surrounding hotels;
- 12 • An energy company has been operating active oil wells on approximately 2.5
13 acres for 23 years and 1.5 acres are subject to an enhanced sharing agreement
14 with TMC, LLC to operate a farmer's market;
- 15 • Richmark Entertainment operates the Wadsworth Theater for commercial
16 productions, and, although it was originally constructed as an entertainment
17 center for veterans, veterans are charged full price for all events held there;
18 Richmark also operates the Brentwood Theater on the WLA Campus;
- 19 • Westside Services LLC operates parking areas throughout the WLA Campus
20 on behalf of businesses and other establishments in the surrounding
21 community;
- 22 • UCLA utilizes the Jackie Robinson Baseball Stadium and complex for its
23 collegiate team and summer baseball camps;
- 24 • Brentwood Private School utilizes 20 acres, on which it has constructed
25 athletic fields, a track, tennis courts, and a swimming pool;
- 26 • The City of Los Angeles utilizes 12 acres as a public park, which includes a
27 fenced dog run, athletic fields, and a parking lot;
- 28 • Two soccer clubs use MacArthur Field, where veterans once played softball,

1 and an adjacent parking lot; and

- 2 • Movie and television production companies utilize portions of the WLA
3 Campus for short-term, non-recurring filming projects, and other private
4 parties rent portions of the land for one-time events, such as fundraisers and
5 weddings.

6 18. DVA and VA GLA officials, including Defendant Eric Shinseki, the
7 Secretary of DVA, and Defendant Donna M. Beiter, the Director of VA GLA, have
8 resisted attempts by descendants of the individuals who donated the land in 1888,
9 including Plaintiff Carolina Winston Barrie and her family, along with veterans,
10 community, and philanthropic organizations to obtain information about these land
11 deals and to retain the original intent of the 1888 land grant. At the same time, VA
12 GLA transferred a parcel of land on the WLA Campus to the State of California to
13 build a geriatric care facility, and inserted a provision in the deed under which title
14 will revert to the federal government if the State ceases using the land “as a nursing
15 home or for domiciliary uses, as agreed upon in the original deed.” VA GLA
16 MASTER PLAN at 10. Thus, VA GLA has acknowledged the original intent behind
17 the 1888 land transfer and even imposed a duty to honor that intent on the State,
18 while openly using portions of the WLA Campus for purposes plainly inconsistent
19 with that intent.

20 19. Through this suit, Plaintiffs seek to vindicate their rights while shining a
21 light on the crisis of homelessness among veterans, particularly in the Greater Los
22 Angeles area, and on the misuse of the WLA Campus. For now the Obama
23 administration’s goal of ending homelessness among veterans is merely a lofty
24 aspiration. Concrete action is necessary to accomplish that goal. As DVA has
25 acknowledged, a critical step in achieving that goal is to provide permanent
26 supportive housing as a reasonable accommodation for veterans like Plaintiffs
27 Valentini, Moraru, Doe, and Romine, who suffer from a mental disability and/or
28 brain injury that renders them unable to obtain or maintain stable housing and who

1 require stable housing to meaningfully access the services to which they are entitled.
2 Given the availability of the WLA Campus, the history of the 1888 donation of the
3 land that created a charitable trust, and the Greater Los Angeles area's status as the
4 capital of veteran homelessness, it is especially reasonable and appropriate to
5 develop such programs in Los Angeles. Through this lawsuit, Plaintiffs seek to
6 compel defendants to do just that.

7 20. Plaintiffs Valentini, Moraru, Doe, and Romine seek declaratory and
8 injunctive relief on behalf of themselves and a class of similarly situated disabled
9 homeless veterans to remedy the unlawful discrimination against Plaintiffs solely by
10 reason of their disabilities, and Plaintiff Vietnam Veterans of America joins them in
11 seeking this relief. Additionally, all Plaintiffs seek declaratory, injunctive, and
12 mandamus relief to enforce the charitable trust that was created by the 1888 deed
13 that transferred the land to the federal government for the express purpose of
14 establishing and *permanently* maintaining a home for disabled veterans and seek an
15 accounting of the monies obtained through land deals and other for-profit use of the
16 WLA Campus inconsistent with the trust requiring use of the land for maintaining a
17 home for disabled veterans.

18 19 JURISDICTION

20 21. This Court has jurisdiction over Plaintiffs' claims for injunctive relief
21 based on 28 U.S.C. § 1331, because those claims arise under federal statutes and
22 federal common law.

23 22. Additionally, this Court has jurisdiction over Plaintiffs' claims under
24 Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. § 793) based on 28 U.S.C.
25 § 1343(a)(4), because those claims seek to secure equitable relief under an Act of
26 Congress.

27 23. To the extent Plaintiffs' claims to enforce the terms of the charitable
28 trust and for an accounting of profits do not present a federal question sufficient to

1 confer jurisdiction under 28 U.S.C. § 1331, this Court has jurisdiction over those
2 claims under 28 U.S.C. § 1367.

3 24. Finally, this Court has jurisdiction over Plaintiffs' alternative claim for
4 mandamus relief under 28 U.S.C. § 1361.

5 25. Pursuant to the Court's jurisdiction over this matter, Plaintiffs Valentini,
6 Moraru, Doe, and Romine bring this action on behalf of themselves and all other
7 persons similarly situated, with respect only to the first and second causes of action
8 in this Complaint.

9 10 VENUE

11 26. Venue is proper in the Central District of California under 28 U.S.C.
12 § 1391(b) because all of the acts and/or omissions complained of herein occurred or
13 will occur in the District.

14 15 PARTIES

16 27. Plaintiff Greg Valentini is a 33-year old citizen of the United States and
17 a resident of Los Angeles County, California. Mr. Valentini is an Army veteran who
18 became severely disabled as a result of his service to this country, including tours of
19 duty in Afghanistan and Iraq. He is eligible for medical benefits from DVA.
20 Because he resides in Los Angeles, he seeks treatment from VA GLA.

21 28. Plaintiff Adrian Moraru is a 37-year old lawful permanent resident of
22 the United States and a resident of Los Angeles County, California. Mr. Moraru is a
23 veteran who became severely disabled after serving this country as a Marine,
24 including a tour of duty in Iraq. He is eligible for medical benefits from DVA.
25 Because he resides in Los Angeles, he seeks treatment from VA GLA.

26 29. Plaintiff Jane Doe is a 54-year old citizen of the United States and a
27 resident of Los Angeles County, California. Ms. Doe is an Army veteran who
28 became severely disabled as a result of her service to this country. She is eligible for

1 medical benefits from DVA. Because she resides in Los Angeles, she seeks
2 treatment from VA GLA.

3 30. Plaintiff Chris Romine is a 35-year old citizen of the United States and a
4 resident of Los Angeles County, California. Mr. Romine is a veteran of the United
5 States Army who became severely disabled after serving this country, including two
6 tours of duty in Iraq. He is eligible for medical benefits from DVA. Because he
7 resides in Los Angeles, he seeks treatment from VA GLA.

8 31. Plaintiff Vietnam Veterans of America (VVA) is a membership-based
9 organization with over 65,000 members across the country. It is the only national
10 Vietnam veterans organization congressionally chartered and exclusively dedicated
11 to Vietnam-era veterans and their families. VVA's goals are to promote and support
12 the full range of issues important to Vietnam veterans, to create a new identity for
13 this generation of veterans, and to change public perception of Vietnam veterans.
14 VVA operates 46 state councils, including the Vietnam Veterans of America,
15 California State Council (VVA-CSC). Hundreds of VVA-CSC members reside
16 within VA GLA's service area. Some of these members have serious mental
17 disabilities and are at risk of becoming homeless.

18 32. Plaintiff Carolina Winston Barrie is a citizen of the United States and a
19 resident of Los Angeles County, California. Ms. Barrie is a direct descendant of
20 Arcadia B. de Baker, who, together with United States Senator John P. Jones,
21 donated the land on which VA GLA's WLA Campus is now located.

22 33. Defendant Eric Shinseki is the Secretary of DVA. He is sued in his
23 official capacity. DVA is a federal agency with headquarters in Washington, D.C.
24 and successor entity to the National Home for Disabled Volunteer Soldiers. DVA
25 oversees the Veterans Health Administration, which operates the United States'
26 largest integrated health care system consisting of 153 medical centers and numerous
27 community-based outpatient clinics, community living centers, vet centers and
28 domiciliaries.

1 34. Defendant Shinseki's official duties as Secretary of DVA include the
2 proper execution and administration of all laws and programs administered by DVA
3 and the control, direction, and management of DVA. *See* 38 USCA § 303. As
4 Secretary of DVA, Defendant Shinseki has the ultimate responsibility for ensuring
5 that DVA and its constituent agencies and programs comply with relevant federal
6 law, regulations, and policies, as well as ensuring that DVA maintains compliance
7 with contracts and land grants such as the 1888 deed referenced in this Complaint.

8 35. Defendant Donna M. Beiter is the Director of VA GLA. She is sued in
9 her official capacity. VA GLA maintains its headquarters in Los Angeles, California,
10 and serves veterans in Los Angeles, Ventura, Santa Barbara, San Luis Obispo, and
11 Kern counties in Southern California. VA GLA is one of five health care systems
12 operated by VA Desert Pacific Healthcare Network, which is one of 21 Veterans
13 Integrated Services Networks (VISNs) operated nationwide by DVA to provide
14 preventive and primary care, acute hospital care, mental health services, specialty
15 care, and long-term care to veterans.

16 36. Defendant Beiter's official duties as Director of VA GLA include
17 supervising the day-to-day operations and services offered by all the institutions
18 operated by VA GLA, including all programs operated at the WLA Campus, and
19 ensuring that VA GLA complies with relevant federal law, regulations, and policies.
20 As the Director of VA GLA, Defendant Beiter has final authority to approve matters
21 related to program design, criteria for admission and continued treatment, and the
22 particular components and nature of all services offered by VA GLA, as well as final
23 decision-making authority related to use of the WLA Campus and any contracts with
24 third parties for access to and use of the WLA Campus.

FACTUAL ALLEGATIONS

The Crisis of Veteran Homelessness

37. As Defendant Shinseki said in 2009, “Those who have served this nation as Veterans should never find themselves on the streets, living without care and without hope.” Sadly, tens of thousands of veterans find themselves in that position every night, homeless like Plaintiffs Valentini, Moraru, Doe, and Romine. The majority of these individuals, including Plaintiffs Valentini, Moraru, Doe, and Romine, suffer from serious mental health disorders and/or brain injuries.

38. One out of every 168 veterans experiences homelessness during the course of a year,³ and DVA estimated that 107,000 veterans were homeless on any given night in 2009.⁴ Veterans are overrepresented in the homeless population and are about 50 percent more likely to become homeless compared to all Americans.⁵

39. Although reliable data is difficult to find, recent veterans who served in OEF and OIF and related operations are at especially high risk of becoming homeless. In December 2010, DVA estimated that over 9,000 OEF/OIF veterans were homeless, and that number is expected to grow as additional service members leave military service.⁶

⁶ Bob Woodruff, Ian Cameron & Christine Romo, “Coming Home Homeless: The New Homeless Among Veterans,” ABC NEWS (Dec. 26, 2010), *available at* <http://abcnews.go.com/ThisWeek/coming-home-homeless-homeless-veterans/story?id=12478952>.

40. Between 44,000 to 66,000 veterans are believed to be experiencing chronic homelessness.⁷ Individuals meet the federal definition of chronic homelessness if they have “a disabling condition” and have “either (a) been continuously homeless for a year or more OR (b) [have] had at least 4 episodes of homelessness in the past three years.” 24 C.F.R. §91.5. Veterans are more likely to be chronically homeless than non-veterans.⁸

Causes of Chronic Homelessness

41. In the late 1990s, researchers began studying individuals who remained
homeless for extended periods, often for years and decades, or who frequently cycled
in and out of homelessness, to try to understand the causes of chronic homelessness
and the barriers that prevent these individuals from attaining and maintaining stable
housing.⁹ This body of research has established the close correlation between
homelessness and disabilities, particularly mental health and substance abuse
disorders.¹⁰ It has also identified numerous barriers that prevent chronically
homeless individuals from accessing the services intended to assist them in
overcoming chronic homelessness.

18 42. First, for individuals with serious mental disabilities, the disability itself

19 ⁷ UNITED STATES INTERAGENCY COUNCIL ON HOMELESSNESS, OPENING DOORS: FEDERAL
STRATEGIC PLAN TO PREVENT AND END HOMELESSNESS 20 (2010), *available at*
20 http://www.usich.gov/PDF/OpeningDoors_2010_FSPPreventEndHomeless.pdf.

⁸ See MARTHA R. BURT, HOMELESSNESS: PROGRAMS AND THE PEOPLE THEY SERVE 11-3 to -6 (1999), available at http://www.huduser.org/portal/publications/pdf/home_tech/tchap-11.pdf (finding that 32 percent of homeless veterans reported being homeless for over 13 months, while only 17 percent of homeless non-veterans reported this extended length of homelessness).

⁹ See Randall Kuhn & Dennis P. Culhane, *Applying Cluster Analysis to Test a Typology of Homelessness by Pattern of Shelter Utilization: Results from the Analysis of Administrative Data*, 26 AM. J. COMMUNITY PSYCHOL. 207, 225 (1998) (finding the chronically homeless have higher levels of mental health, substance abuse, and medical problems).

¹⁰ See, e.g., David P. Folsom et al., *Prevalence and Risk Factors for Homelessness and Utilization of Mental Health Services Among 10,340 Patients with Serious Mental Illness in a Large Public Mental Health System*, 162 A.J. PSYCHIATRY 370 (2005) (finding that between one-fourth and one-third of persons experiencing homelessness have current severe psychiatric conditions, such as schizophrenia, major depression, and bipolar disorder, and that 50 percent of these individuals have co-occurring substance abuse disorder).

1 is a barrier both to acquiring and maintaining stable housing and to accessing
2 medical and mental health care, shelter, and other vital services once these
3 individuals become homeless.¹¹ Without supports or assistance, these individuals
4 cannot access available services to treat the disability or to meet their basic needs.
5 For example, many individuals with severe mental illness or cognitive impairment
6 are not capable of completing applications or persisting through intake processes
7 without substantial assistance, which is often not provided.¹² Similarly, individuals
8 with PTSD frequently experience memory loss and other cognitive impairments that
9 result in difficulty remembering appointments, which can lead to dismissal from
10 programs for “noncompliance.” Additionally, for some individuals with severe
11 mental disabilities, their disabilities prevent them from functioning in the settings in
12 which the services are offered, such as individuals whose disabilities prevent them
13 from sharing living space or sleeping quarters with others, but who are required to
14 complete a transitional housing program that requires dorm-style living before they
15 are eligible for permanent housing.

16 43. Lack of housing also exacerbates mental disabilities and creates new
17 health problems, thereby impairing the individual’s ability to function and impeding
18 the individual’s ability to access necessary services. For example, the experience of
19 homelessness is inherently stressful, requiring constant vigilance to avoid danger,
20 and exposes homeless individuals to increased risks of trauma, leading to PTSD or
21 aggravating already existing PTSD and other mental disorders.¹³ For individuals

22 ¹¹ See, e.g., Amy L. Drapalski et al., *Perceived Barriers to Medical Care and Mental*
23 *Health Care Among Veterans with Serious Mental Illness*, 59 PSYCHIATRIC SERVICES 921 (2008),
24 available at <http://ps.psychiatryonline.org/cgi/content/abstract/59/8/921> (finding that psychiatric symptoms and mental illness severity pose one of the most significant barriers to medical and mental health care).

25 ¹² See Michael D. Nino et al., *Who are the Chronically Homeless? Social Characteristics*
26 *and Risk Factors Associated with Chronic Homelessness*, 19 J. SOC. DISTRESS & HOMELESS 41
(2010) (finding chronically homeless individuals were more likely to report that paper work for government benefits was too difficult to complete).

27 ¹³ See Bruce D. Levy & James J. O’Connell, *Health Care for Homeless Persons*, 350 NEW
28 ENG. J. MED. 2329, 2330 (2004) (finding that life on the street increases social isolation and the risk of psychiatric conditions).

1 whose disability causes paranoia or severe anxiety, the uncertainty and diminished
2 security and safety created by homelessness exacerbate the mental disability.¹⁴ For
3 many individuals with serious mental disabilities, effective health treatment
4 presupposes stability and regularity, which is simply not possible for chronically
5 homeless individuals to achieve.¹⁵ Additionally, individuals experiencing
6 homelessness frequently suffer from chronic and acute health conditions that are
7 caused or exacerbated by the lack of stable shelter, including respiratory disorders,
8 cardiovascular diseases, frostbite and hypothermia, skin diseases, diabetes, liver
9 disease, and traumatic injuries due to assaults, falls, and accidents.¹⁶

10 44. Thus, homelessness resulting from mental disability, and mental
11 disability aggravated by homelessness, interfere both with the ability to obtain
12 treatment and with amelioration of the mental disability itself, including the ability to
13 obtain appropriate psychotropic medications. Accessing these services requires
14 capacities to understand, plan, and follow procedures and to tolerate waiting rooms
15 and other conditions that are frequently beyond the impaired abilities of chronically
16 homeless individuals with mental disabilities. Lacking effective access to
17 appropriate medication and supervised treatment, homeless individuals with mental
18 disabilities frequently resort to inappropriate medication, in the form of illegal drugs
19 that can have powerful psychotropic effects but are also most often addictive and

21 ¹⁴ See Kevin M. Fitzpatrick et al., *Dangerous Places: Exposure to Violence and Its Mental*
22 *Health Consequences for the Homeless*, 69 A.J. ORTHOPSYCHIATRY 438, 444-45 (1999), available
23 at <http://onlinelibrary.wiley.com/doi/10.1037/h0080392/pdf> (finding that patients experiencing
anxiety and paranoia were "significantly affected by the perceived dangers inherent in the homeless
environment").

24 ¹⁵ See Deborah L. Dennis et al., *The Physical and Mental Health Status of Homeless Adults*,
25 2 HOUSING POL'Y DEBATE 815, 822 (1991), available at
26 [http://www.knowledgeplex.org/kp/text_document_summary/scholarly_article/relfiles/hpd_0203_d](http://www.knowledgeplex.org/kp/text_document_summary/scholarly_article/relfiles/hpd_0203_dennis2.pdf)
27 [ennis2.pdf](http://www.knowledgeplex.org/kp/text_document_summary/scholarly_article/relfiles/hpd_0203_dennis2.pdf) ("Homeless persons present a more advanced state of [mental] illness and are less likely,
28 due to their homeless situation, to follow even the simplest of treatment regimens.").

29 ¹⁶ See Bruce D. Levy & James J. O'Connell, *Health Care for Homeless Persons*, 350 NEW
30 ENG. J. MED. 2329, 2330 (2004); see also Mayur M. Desai & Robert A. Rosenheck, *Unmet Need*
31 *for Medical Care Among Homeless Adults with Serious Mental Illness*, 27 GEN. HOSP. PSYCHIATRY
32 418 (2005) (finding that 43.6 percent of persons who are homeless and have serious mental
33 illnesses had unmet needs for medical care at the time of program entry).

1 come with negative side effects.¹⁷

2 45. The lack of housing itself, especially combined with a serious mental
3 disability, is a formidable barrier to accessing services. For many homeless
4 individuals, the immediacy of the daily struggle for shelter, food, and other
5 necessities relegates medical and mental health needs to a distant priority.¹⁸ Thus,
6 common illnesses and injuries are left untreated, leading to increased emergency
7 hospital visits and acute care admissions.¹⁹

8 46. In sum, a robust body of research has established that the subset of the
9 homeless population who, like Plaintiffs Valentini, Moraru, Doe, and Romine, suffer
10 from severe mental illnesses, such as PTSD, paranoid schizophrenia, and bipolar
11 disorder, are unable to meaningfully access the range of services offered to homeless
12 individuals to meet their day-to-day needs, including shelter, or to obtain appropriate
13 health care, mental health care, or addiction treatment, due to symptoms of their
14 disabilities and their lack of stable housing.

15
16 **Factors that Make Veterans Especially Susceptible to Chronic Homelessness**

17 47. Like other homeless populations, homeless veterans' risk factors for
18 chronic homelessness include poverty, joblessness, mental illness, and substance
19 abuse.²⁰ Due to the relatively higher incidence of mental illness and substance abuse
20 disorders among veterans, however, veterans are particularly vulnerable to chronic
21

22 ¹⁷ See Timothy P. Johnson & Michael Fendrich, *Homelessness and Drug Use: Evidence*
23 *from a Community Sample*, 32 AM. J. PREVENTATIVE MED. S211, S212 ("Homeless individuals . . .
abuse drugs and alcohol in an attempt to provide self-medication for psychiatric or physical health
problems.").

24 ¹⁸ See Dennis, *supra* note 15, at 826 (finding mentally ill homeless persons often do not
25 receive needed physical and mental health care because they "giv[e] higher priority to other basic
needs, such as procuring food and shelter on a daily basis.").

26 ¹⁹ Margot B. Kushel et al., *Factors Associated with the Health Care Utilization of Homeless*
27 *Persons*, 285 JAMA 200 (2001) (finding that compared with the general population, the homeless
are 3 times more likely to seek emergency care at least once in a year).

28 ²⁰ Robert A. Rosenheck & Peter Koegel, *Characteristics of Veterans and Nonveterans in*
Three Samples of Homeless Men, 44 HOSP. & COMMUNITY PSYCHIATRY, 858, 861 (1993).

homelessness.²¹ Although military service as such is not predictive of homelessness, military service is strongly associated with factors that contribute to homelessness.²² For example, combat exposure and the stress related to deployment contribute to high levels of social isolation upon returning home, psychiatric disorders, and substance abuse disorders, all of which, in turn, contribute directly to homelessness.²³

48. Veterans of the post-Vietnam All-Volunteer Force era have an even higher risk of mental-illness-induced homelessness than veterans from earlier eras.²⁴ Researchers have identified several causes for the increased risk of mental illness and subsequent homelessness of veterans of recent conflicts, including waning public support and lower morale among troops, the nature of modern warfare resulting in unexpected threats to life via roadside bombs and improvised explosive devices, and multiple and more-lengthy deployments.²⁵ According to one study, one in five soldiers who were deployed as part of OEF/OIF returned home with symptoms of PTSD or major depression, which is a substantially higher rate than the general

²¹ See, e.g., Robert Rosenheck et al., *The Proportion of Veterans Among Homeless Men*, 84 AMERICAN J. OF PUB. HEALTH 466 (1994) (finding that higher prevalence of psychiatric illness, substance abuse, and, especially, antisocial personality disorder among veterans is a contributor to their greater vulnerability to homelessness).

²² See, e.g., Robert Rosenheck & Alan Fontana, *A Model of Homelessness Among Male Veterans of the Vietnam War Generation*, 151 AM. J. PSYCHIATRY 421, 425 (1994) (reporting significant indirect effects on homelessness resulting from war zone traumatic experience).

²³ *Id.* at 421 (finding that post-military social isolation, psychiatric disorder, and substance abuse had the strongest direct effects on homelessness).

²⁴ See, e.g., Karen H. Seal et al., *Trends and Risk Factors for Mental Health Diagnoses Among Iraq and Afghanistan Veterans Using Department of Veterans Affairs Health Care, 2002-2008*, 99 AM. J. PUB. HEALTH 1651 (2009) (documenting that 37 percent of veterans returning from Iraq and Afghanistan who utilized DVA health care system between 2002 and 2008 received a mental health diagnosis); Anna Kline, et al., *The Relationship Between Military Service Eras and Psychosocial Treatment Needs Among Homeless Veterans with a Co-Occurring Substance Abuse and Mental Health Disorder*, 5 J. DUAL DIAGNOSIS 358 (2009) (finding that mentally ill, substance-abusing veterans of recent conflicts became homeless at an earlier age than other veterans and were more likely to attribute their homelessness to mental health problems).

²⁵ See Seal, *supra* note 24, at 1656; see also Charles S. Milliken, et al., *Longitudinal Assessment of Mental Health Problems Among Active and Reserve Component Soldiers Returning from the Iraq War*, 298 JAMA 2141 (2007) (finding combat exposure was associated with higher rates of PTSD among veterans of OIF).

1 population.²⁶

2
3 **Without Stable Housing, Seriously Disabled Individuals**
4 **Cannot Meaningfully Access Critical Services**

5 49. Although addressing the needs of homeless individuals with serious
6 mental illness is complex, research conducted over the last few decades confirms that
7 stable housing is a precondition to effective treatment of severe mental disorders
8 and/or associated addiction disease. With the stability and security of permanent
9 housing, the formerly homeless veteran with severe disabilities can meaningfully
10 access mental health, physical health, substance abuse, vocational, and other services.
11 Permanent supportive housing is thus intended specifically for homeless individuals
12 with disabilities who, without housing, cannot access and make effective use of the
13 treatment and services they need to stay stable; and who, without such treatment and
14 supportive services, cannot access and maintain stable housing.

15 50. A significant body of evidence demonstrates that permanent supportive
16 housing has successful long-term housing outcomes for previously chronically
17 homeless persons, including those with the most severe impediments.²⁷ In addition
18 to housing stability, studies have shown enormous benefits for participants in
19 permanent supportive housing programs. Documented outcomes include improved
20 mental health status, decreased substance abuse, increased average income, and
21 improved quality of life.²⁸

22 ²⁶ THE INVISIBLE WOUNDS OF WAR: PSYCHOLOGICAL AND COGNITIVE INJURIES, THEIR
23 CONSEQUENCES, AND SERVICES TO ASSIST RECOVERY, at xxi (Terri Tanielian & Lisa H. Jaycox
24 eds., RAND Corporation 2008), available at
http://www.rand.org/content/dam/rand/pubs/monographs/2008/RAND_MG720.pdf.

25 ²⁷ See, e.g. Sam Tsemberis & Ronda F. Eisenberg, *Pathways to Housing: Supported*
26 *Housing for Street-Dwelling Homeless Individuals with Psychiatric Disabilities*. 51 PSYCHIATRIC
27 SERVICES 487, 491 (2000) (finding 88 percent housing-retention rate for permanent supportive
housing program over five-year period – a much lower risk of homelessness than in traditional
residential treatment programs);.

28 ²⁸ See, e.g., PERLMAN, *supra* note 27 (finding that 50 percent of residents in the Denver
program had improved mental health status, 64 percent reported improved quality of life, and 15
percent had decreased substance abuse, and that average monthly income rose from \$185 to \$431);

(cont'd)

1 51. Aside from individual benefits for veterans, permanent supportive
2 housing also provides substantial cost savings to government at all levels. When left
3 on the streets, the homeless utilize a substantial array of community resources in the
4 form of increased health care utilization, emergency room care, public health
5 services, and continuing use of expensive temporary shelters. Numerous studies
6 have demonstrated that permanent supportive housing offers substantial cost savings
7 when compared to alternative homeless interventions. For example, Dennis
8 Culhane, a professor at the University of Pennsylvania who also serves as the
9 Director of Research for the National Center on Homelessness Among Veterans at
10 DVA, conducted a comprehensive study of permanent supportive housing that
11 tracked the costs associated with nearly 10,000 homeless persons with mental illness
12 in New York City for two years while they were homeless and two years after they
13 were housed. Dr. Culhane found that supportive housing created average annual
14 savings of \$16,282 per person. Seventy-two percent of the savings resulted from a
15 decline in the use of public health services, 23 percent of the savings resulted from a
16 decline in shelter use, and the remaining 5 percent of the savings resulted from
17 reduced incarceration of homeless people. The reduction in expenditures in these
18 areas nearly covered the cost of developing, operating, and providing supportive
19 housing services, resulting in a net cost to the government of only \$995 per unit per
20 year.²⁹ A study conducted by the Economic Roundtable for the Los Angeles

26 *Homeless Persons with Severe Mental Illness in Supportive Housing*, 13 HOUSING POL'Y DEBATE
27 107 (2002); see also DANIEL FLAMING ET AL., WHERE WE SLEEP: COSTS WHEN HOMELESS AND
28 HOUSED IN LOS ANGELES 26 (2009) (documenting \$2,291 average monthly cost savings for each
chronically homeless Los Angeles participant); MASSACHUSETTS HOUSING AND SHELTER
ALLIANCE, HOME AND HEALTHY FOR GOOD: A STATEWIDE HOUSING FIRST PROGRAM (2010)
(documenting cost savings of \$9,507 per resident per year, including reduction in medical costs
from \$26,124 per person per year to \$8,500); Tia E. Martinez & Martha R. Burt, *Impact of*
Permanent Supportive Housing on the Use of Acute Care Health Services by Homeless Adults, 57

(cont'd)

1 Homeless Services Authority found that the public costs attributed to chronically
2 homeless persons in permanent supportive housing averaged \$27,504 per year less
3 than the costs attributed to similar persons when they were on the streets or in
4 shelters.³⁰

5 52. Finally, communities with permanent supportive housing programs are
6 safer, more efficient, and more attractive. In some instances, property values in
7 neighborhoods surrounding permanent supportive housing programs have
8 increased.³¹

9 53. The success of permanent supportive housing has been replicated in Los
10 Angeles, as exemplified by Project 50 and later by other similar projects in the
11 region. Spearheaded by Los Angeles County Supervisor Zev Yaroslavsky, the goal
12 of Project 50 was to identify, then place into permanent supportive housing, the 50
13 most vulnerable people who were sleeping on the streets of Skid Row. Many of
14 these individuals had been designated "shelter resistant," because they preferred
15 sleeping on the streets to being in a crowded shelter situation. But all of those
16 offered their own housing, albeit a small, private room in a nonprofit housing
17 facility, accepted the offer. Forty-nine people were placed into permanent supportive
18 housing, and 88 percent remained housed one year later. Ninety-one percent of

22 Francisco); THE HEARTLAND ALLIANCE, SUPPORTIVE HOUSING IN ILLINOIS: A WISE INVESTMENT
(2009) (documenting overall savings of \$854,477 over two years); ERIC HIRSCH & IRENE GLASSER,
RHODE ISLAND'S HOUSING FIRST PROGRAM FIRST YEAR EVALUATION (2007) (documenting cost
savings of \$8,839 per person per year).

23 ³⁰ FLAMING, *supra* note 29.

24 ³¹ See, e.g., FURMAN CENTER FOR REAL ESTATE & URBAN POLICY, THE IMPACT OF
25 SUPPORTIVE HOUSING ON SURROUNDING NEIGHBORHOODS: EVIDENCE FROM NEW YORK CITY 6-7
(2008), *available at*
26 http://furmancenter.org/files/FurmanCenterPolicyBriefonSupportiveHousing_LowRes.pdf
(examining the impact of 7,500 supportive housing units in New York City and finding a
27 statistically significant rise in the value of nearby properties); ARTHUR ANDERSEN, CONNECTICUT
28 SUPPORTIVE HOUSING DEMONSTRATION PROGRAM: FINAL PROGRAM EVALUATION REPORT chp. III
(2002), *available at* <http://documents.csh.org/documents/pubs/CT2002Evaluation.pdf> (finding
supportive housing improved neighborhood safety and beautification and increased or stabilized
property values).

1 tenants were diagnosed with a mental illness and 84 percent reported a history of
2 substance abuse. Similar to other studies, Project 50 showed that health care costs
3 for participants declined from \$677,000 the year prior to participation in the program
4 to \$185,000 for the year after they began living in supportive housing.³²

5 54. In short, both experience and empirical research have demonstrated that
6 permanent supportive housing is the only approach that consistently ensures that
7 individuals with serious mental disabilities are able to meaningfully access necessary
8 medical care, mental health services, and other social services.

9 55. These lessons can and must be applied to address the crisis of chronic
10 veteran homelessness in order to ensure that our veterans receive the medical care
11 and support to which they are entitled and that they deserve, as even DVA itself has
12 recognized. According to a report recently co-authored by DVA, “[f]or the large
13 percentage of veterans with disabilities, permanent supportive housing would be
14 effective in helping them achieve long-term stability.”³³

15 16 **The Crisis of Veteran Homelessness in the Greater Los Angeles Area**

17 56. According to a 2009 survey conducted by VA GLA staff, there were
18 8,197 homeless veterans on any given day within VA GLA’s coverage area, so
19 approximately 8 percent (8,197 of the estimated 107,000) of all homeless veterans in
20 the United States lived within VA GLA’s coverage area in 2009.³⁴

21 57. In 2011, VA GLA released data about the homeless veteran population
22 that had received services from VA GLA in fiscal year 2010. Of the 6,397 homeless
23 veterans that VA GLA documented as having received services in fiscal year 2010,

24 ³² See *Project 50 – 1 year Progress Report*, L.A. CNTY. BD. SUPERVISORS (Feb. 4, 2009),
25 <http://zev.lacounty.gov/wp-content/uploads/Project50-ONE-YEAR-SNAPSHOT-2.4.09.pdf>.

26 ³³ U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT & U.S. DEPARTMENT OF
27 VETERANS AFFAIRS, *VETERAN HOMELESSNESS: A SUPPLEMENTAL REPORT TO THE 2009 ANNUAL
HOMELESS ASSESSMENT REPORT TO CONGRESS 30*, available at
<http://www.hudhre.info/documents/2009AHARVeteransReport.pdf> (last accessed May 29, 2011).

28 ³⁴ See JOHN NAKASHIMA, *CHALENG 2009 SURVEY RESULTS SUMMARY VISN 22*,
available at http://www.va.gov/HOMELESS/docs/chaleng/chaleng_visn_22.pdf.

1 more than half served in the U.S. Armed Forces after the Vietnam War. Their
2 average age was 51. Ninety-five percent were male, 52 percent were African-
3 American, 29 percent were white, and 14 percent were Latino. About 34 percent had
4 been homeless for one year or longer. Forty-eight percent indicated a serious
5 substance abuse problem. In total, 46 percent had a serious psychiatric disorder,
6 including psychosis and PTSD. Twenty-six percent had both a substance abuse
7 problem and a serious psychiatric disorder, and 52 percent reported at least one
8 serious medical problem. VA GLA reported providing services to 130 homeless
9 veterans who had served in Iraq or Afghanistan.³⁵

10 58. Thus, Defendants know or should know that the population of veterans
11 served by VA GLA includes numerous disabled individuals, who, like Plaintiffs
12 Valentini, Moraru, Doe, and Romine, cannot meaningfully access the medical and
13 other benefits to which they are entitled unless they have stable housing that is linked
14 to the services provided by VA GLA.

15 16 **Overview of Veterans' Benefits Programs**

17 59. There are three administrations within DVA: the Veterans Health
18 Administration (VHA), the Veterans Benefits Administration (VBA), and the
19 National Cemetery Administration (NCA). The VHA is tasked with providing "a
20 complete medical and hospital service for the medical care and treatment of
21 veterans" 38 U.S.C. § 7301(b).³⁶

22 ³⁵ See JOHN NAKASHIMA, VA PROGRAMS FOR HOMELESS VETERANS AT VA GREATER LOS
23 ANGELES HEALTHCARE SYSTEM: AN OVERVIEW OF THE COMPREHENSIVE HOMELESS CENTER
(January 14, 2011).

24 ³⁶ The VBA administers "nonmedical benefits programs . . . which provide assistance to
25 veterans and their dependents and survivors." 38 U.S.C. § 7701(a). To be eligible for disability
26 compensation benefits from the VBA, veterans must present: evidence of a medical diagnosis of
27 the current impairment; evidence of an in-service incident or an aggravation of the disease or injury
28 causing the impairment; and medical proof of a connection between the in-service incident or
aggravation and the current disability. For the purposes of disability compensation, "[s]ervice-
connected means . . . that such disability was incurred or aggravated . . . in line of duty in the active
military, naval, or air service." 38 C.F.R. § 3.1(k). If a veteran is found eligible for disability
compensation, DVA uses a schedule to set the amount of earnings impairment on a percentage
basis. 38 U.S.C. § 1155. The NCA is "responsible for the interment of deceased servicemembers

(cont'd)

1 60. To qualify for VHA benefits, a former service-member must have been
2 “discharged or released” from service “under conditions other than dishonorable,” 38
3 U.S.C. § 101(2), and must have performed “active duty” in the military, 38 U.S.C. §
4 101(2). There is no length of service requirement for former enlisted persons who
5 started active duty before September 8, 1980, or for former officers who first entered
6 active duty before October 17, 1981. 38 U.S.C. § 5303A(b)(2). All other veterans
7 must have 24 months of continuous active duty unless they qualify for an exception
8 to the minimum service requirement. 38 U.S.C. § 5303A(b)(1). Exceptions to the
9 minimum service requirement include discharges “for a disability incurred or
10 aggravated in the line of duty.” 38 U.S.C. § 5303A(b)(3)(B).

11 61. Veterans who qualify for VHA benefits are placed into one of eight
12 “priority groups” established by DVA regulations to determine their eligibility for
13 benefits. *See* 38 C.F.R. § 17.36(b). Veterans in the highest priority groups, 1
14 through 3, have service-connected disabilities of varying degrees. 38 C.F.R. §
15 17.36(b)(1)-(3). Veterans in priority group 4 have serious disabilities that are not
16 service-connected. 38 C.F.R. § 17.36(b)(4). Priority group 5 consists of low-income
17 veterans. 38 C.F.R. § 17.36(b)(5). Priority group 6 includes veterans exposed to
18 certain toxic substances, as well as recent combat veterans. 38 C.F.R. § 17.36(b)(6).
19 Veterans in priority groups 7 and 8 have no compensable service-connected
20 disabilities and have greater incomes than those in priority group 5. 38 C.F.R. §
21 17.36(b)(6)-(7). “A veteran will be placed in the highest priority category or
22 categories for which the veteran qualifies.” 38 C.F.R. § 17.36(d)(3)(ii).

23 62. Depending on the amount of funding provided by Congress, DVA may
24 “prioritize” the higher priority groups and provide VHA benefits only to veterans in
25 those priority groups. Currently, however, any veteran who falls within any one of
26

27 *(cont'd from previous page)*
28 and veterans,” and controls all “cemeteries under the jurisdiction of the Veterans’
Administration . . .” 38 U.S.C. § 2400.

1 the first seven priority groups is eligible for the full VHA benefits package, and some
2 veterans who fall within priority group 8 are also eligible.

3 63. Additionally, regardless of whether a veteran is enrolled in the VHA
4 benefits program, DVA must provide hospital care and medical services "to any
5 veteran for a service-connected disability," 38 U.S.C. § 1710(a)(1)(A), "[e]ven if
6 [the veteran is] not enrolled in the VA healthcare system." 38 C.F.R. § 17.37(b).
7 DVA must also provide hospital care and medical services "to any veteran who has a
8 service-connected disability rated at 50% or more," regardless of whether the
9 treatment concerns the disability, 38 U.S.C. § 1710(a)(1)(B), and even if the veteran
10 is not enrolled in the medical benefits program. 38 C.F.R. § 17.37(a).

11 64. The benefits package offered through VHA includes outpatient medical,
12 surgical, and mental healthcare; inpatient hospital, medical, surgical, and mental
13 healthcare; prescription drug coverage; emergency care; substance abuse treatment,
14 and other services. *See* 38 C.F.R. § 17.38(a). Subject to congressional
15 appropriations, the VA must also "provide nursing home care . . . (1) to any veteran
16 who is in need of such care for a service-connected disability, and (2) to any veteran
17 who is in need of such care and who has a service-connected disability rated at 70
18 percent or more." 38 U.S.C. § 1710A(a). Thus, VHA provides preventive and
19 primary care, acute hospital care, mental health services, specialty care, and long-
20 term care, which includes residential treatment and housing services in some
21 circumstances. These services are collectively referred to herein as "VHA benefits."

22 23 **VA GLA Serves Veterans in the Greater Los Angeles Area**

24 **Who Are Eligible for VHA Benefits**

25 65. VHA provides VHA benefits to eligible veterans through twenty-one
26 (21) Veterans Integrated Services Networks (VISNs) around the country.

27 66. VA Desert Pacific Healthcare Network is the VISN that provides
28 services to veterans in Southern California and Southern Nevada. These services are

1 delivered through five healthcare systems – one in Southern Nevada and four in
2 Southern California. Each healthcare system operates a medical center with a
3 hospital and other inpatient and outpatient services, as well as varying numbers of
4 community clinics and vet centers.

5 67. VA GLA is one of these healthcare systems. The coverage area for VA
6 GLA includes all or parts of Los Angeles County, Ventura County, Kern County,
7 Santa Barbara County, and San Luis Obispo County.

8 68. As the Director of VA GLA, Defendant Beiter is the VA GLA official
9 with final responsibility and authority to approve, modify, or terminate programs or
10 services offered as part of the VHA benefits delivered by VA GLA, and she is the
11 sole VA GLA official with responsibility and authority to approve specific uses of
12 the WLA Campus, including entering into land use agreements with private and
13 public entities.

14 69. The focal point of services offered by VA GLA is the WLA Campus.
15 The WLA Campus is a 387-acre parcel located about five miles from the Pacific
16 Ocean in an unincorporated area of Los Angeles County surrounded by the City of
17 Los Angeles. It is located between Sunset Boulevard to the north, Ohio Avenue to
18 the south, Interstate Highway 405 to the east, and San Vicente Boulevard to the west.
19 In addition to the array of services available at the WLA Campus, VA GLA operates
20 three ambulatory care centers, nine community clinics, and five vet centers
21 throughout its coverage area.

22 History of the WLA Campus

23
24 70. The land on which the WLA Campus is now located was donated to the
25 federal government in 1888 by United States Senator John P. Jones and Arcadia B.
26 de Baker for the purpose of establishing and permanently maintaining a soldier's
27 home for disabled war veterans on that land.

28 71. In 1865, Congress incorporated the National Home for Disabled

1 Volunteer Soldiers ("National Home") to operate branch homes throughout the
2 nation for soldiers who had been honorably discharged. The branch homes were
3 intended as true homes offered as a debt of gratitude to those who had served the
4 country. Accordingly, residents were provided housing, food, medical care,
5 recreation activities, and employment opportunities. There were no limitations on
6 how long a veteran could stay at a branch home once admitted.

7 72. Additionally, "disability" for the purposes of admission was interpreted
8 broadly. Veterans with physical wounds from their military service were admitted,
9 as well as individuals with recurring illnesses or psychological trauma that rendered
10 them unable to support themselves in civilian life. Although veterans could receive
11 medical treatment while they stayed at a branch home, many residents of the branch
12 homes did not require or receive ongoing medical care.

13 73. Thus, the National Home offered the promise of a *permanent* home for
14 veterans who had served their country and, by virtue of their service, were not able to
15 support themselves in civilian life.

16 74. Between 1865 and 1870, the National Home's Board of Governors
17 opened four branch homes east of the Rocky Mountains. In 1887, Congress
18 authorized the National Home's Board of Governors to establish a branch home west
19 of the Rocky Mountains. The legislation authorized the Board of Governors to
20 acquire land for this purpose.

21 75. In 1888, Senator John P. Jones and Arcadia B. de Baker donated the
22 land on which the WLA Campus now sits to the National Home for the purpose of
23 establishing and permanently maintaining the branch home authorized by the 1887
24 legislation.³⁷ The deed conveying the land ("1888 Deed") provided, in pertinent part,

25 ³⁷ The 1888 Deed conveyed 300 acres to the National Home. In 1899 and 1921, successors
26 to Senator Jones and Mrs. de Baker conveyed additional land to the National Home to further the
27 purpose of permanently maintaining the National Home. All 387 acres of the WLA Campus were
conveyed through the 1888 Deed and the two later deeds from the original donors' successors.

28 In 1888, John Wolfskill also conveyed 300 acres of adjacent land to the National Home.
The land conveyed by that deed is now used as a national cemetery and federal buildings and is not
a part of the WLA Campus.

1 WITNESSETH: That whereas by an act of Congress
2 approved March 2nd, 1887, to provide for the location
3 and erection of a branch home for disabled volunteer
4 soldiers West of the Rocky Mountains, the Board of
5 Managers of the National Home for Disabled Volunteer
6 Soldiers, were authorized, empowered and directed to
7 locate, establish, construct and permanently maintain a
8 branch of said National Home for Disabled Volunteer
9 Soldiers, to be by such Board, located at such place in the
10 States West of the Rocky Mountains as to said Board
11 should appear most desirable and advantageous. . . .

12 And whereas, the parties hereto of the first part [grantors]
13 in consideration that the party hereto of the second part
14 [National Home] should locate, establish, construct and
15 permanently maintain a branch of said National Home
16 for Disabled Volunteer Soldiers on a site to be selected
17 by its Board of Managers along the dividing line between
18 the Ranchos San Jose de Buenos Ayres and San Vicente
19 y Santa Monica offered to donate to the said party of the
20 second part, three hundred acres of land, being a portion
21 of said Rancho San Vicente y Santa Monica, belonging
22 to them, the said parties of the first part, on which to
23 locate, establish, construct and permanently maintain
24 such branch of said National Home for Disabled
25 Volunteer Soldiers. . . .

26 Now therefore, in consideration of the premises and of
27 the location, establishment, construction and permanent
28 maintenance of a branch of said National Home for
Disabled Volunteer Soldiers on such tract of land so
selected and of the benefits to accrue to the said parties of
the first part, owners of the said Rancho San Vicente y
Santa Monica, by such location have given and granted
and by these presents do give and grant unto the said
party of the second part, all the following described land
and premises, situate lying and being in the County of
Los Angeles, State of California and particularly
bounded and described as follows: . . . for the purpose of
such branch Home for Disabled Volunteer Soldiers to be
thereon so located, established, constructed and
permanently maintained.

23 76. The Pacific Branch of the National Home ("Pacific Branch Home")
24 opened in 1888 and housed approximately one thousand veterans in temporary
25 barracks until the permanent quarters were completed in 1891 and 1893.

26 77. Consistent with the goal of providing a home for soldiers, the grounds at
27 the Pacific Branch Home were transformed into a beautiful, park-like setting. A
28 hospital and other buildings were erected on the campus throughout the 1890s. The

1 Pacific Branch Home also built a trolley line and erected a streetcar depot, which
2 transported freight and mail to and from the campus. Residents could easily travel to
3 the nearby Santa Monica beaches from the campus for rest and recreation. A chapel
4 was built in 1900 to hold daily services and burial services for deceased veterans. In
5 the early 1900s, the Pacific Branch Home built dormitories with wide porches to
6 replace the original barracks and opened a dining hall that could seat 760 members at
7 one time. A post office with more than 600 private letter boxes operated on the
8 campus, as well as a store where residents could eat lunch and purchase cigars, fruits,
9 candy and other articles.

10 78. In addition to ensuring residents' access to housing, food and medical
11 care, the Pacific Branch Home also developed the campus to provide educational and
12 vocational activities for the veteran residents. For example, the Pacific Branch
13 Home boasted a library with more than 10,000 volumes and newspapers and
14 periodicals from around the country. The residents grew vegetables and tended
15 orchards and livestock on the campus, supplying their own needs and selling the
16 surplus. The Pacific Branch Home maintained a baseball team and athletic facilities,
17 built a billiard hall for the residents, founded an aviary where residents could spend
18 time, and developed work programs to employ residents around the campus in
19 various capacities. The Pacific Branch Home also had a home band that performed
20 daily, and lectures and movies were regularly hosted on the campus. Residents could
21 attend all events on the campus free of charge. By 1922, approximately 4,000
22 veterans were provided permanent housing at the Pacific Branch Home, with about
23 600 of them under hospital care.

24 79. In 1930, Congress consolidated the National Home with other veterans'
25 programs in the newly established Veterans Administration, the immediate
26 predecessor to DVA. Accordingly, control over the various branch homes, including
27 the Pacific Branch Home, transferred to the Veterans Administration. Title to the
28 land upon which the branch homes were situated was also transferred to the Veterans

1 Administration as the National Home's successor-in-interest to all land to which the
2 National Home held title.

3 80. The Pacific Branch Home campus experienced tremendous
4 development from the 1930s to 1950s, and many of the existing buildings on the
5 WLA Campus were erected during this time. For instance, the Veterans
6 Administration built additional hospital buildings and medical care centers on the
7 campus, in addition to updating and upgrading the hospital and the residences for
8 disabled veterans who continued to reside on the campus. It appears, however, that,
9 beginning in the 1960s and 1970s, new residents were not accepted at the campus,
10 and the structures formerly dedicated to permanent housing were repurposed or fell
11 into disuse. DVA was established as a cabinet-level agency in 1989.

12 81. Today, there are approximately 104 buildings on the WLA Campus.
13 Many of the buildings are vacant, closed, or underutilized. With the exception of
14 geriatric nursing care beds, no permanent housing is available to disabled veterans on
15 the WLA Campus. Instead, VA GLA offers only inpatient hospital care and
16 emergency or transitional shelter beds for disabled and homeless veterans on the
17 WLA Campus, even though it has built 13 houses on the WLA Campus to house VA
18 GLA senior staff. Indeed, in contrast to the original intent of the grantors that the
19 land be used to provide a permanent home to disabled veterans, the mission
20 statement of VA GLA, which now operates and controls the WLA Campus, focuses
21 exclusively on providing medical treatment to veterans and serving as a research and
22 teaching hospital.

23 82. According to VA GLA, the WLA Campus "is perceived to be one of the
24 most valuable parcels of real estate in the western United States." VA GLA MASTER
25 PLAN at 8. Numerous commercial and other non-DVA programs operate on the
26 WLA Campus under leases, memoranda of understanding, revocable licenses, or
27 enhanced sharing agreements, all of which were approved by Defendant Beiter or her
28 predecessors as Director of VA GLA. As a result of these land use deals, veterans

1 have limited access to or are altogether prohibited from accessing 110 acres of the
2 387-acre WLA Campus, and DVA and VA GLA cannot utilize that land to provide
3 housing to veterans or otherwise expand the services offered to veterans on the WLA
4 Campus. In addition, portions of the land have been offered for rent in connection
5 with events and for various other for-profit uses, including filming for movies and
6 television shows.

7 83. There has not been a public accounting of how much money VA GLA
8 has received under these private deals and where any such revenue has been directed.

9
10 **Services Currently Offered by VA GLA at the WLA Campus**

11 84. The VA GLA operates the West Los Angeles Medical Center on the
12 WLA Campus, offering care in the following areas: medicine, surgery, psychiatry,
13 physical medicine and rehabilitation, neurology, oncology, dentistry, geriatrics, and
14 extended care. Research and academic medical training are also conducted on-site.
15 In addition to the services offered on the WLA Campus, veterans can access certain
16 outpatient services from VA GLA through three ambulatory care centers and eleven
17 community treatment centers. The WLA Campus contains numerous medical and
18 residential treatment facilities, including inpatient and outpatient health care and
19 mental health care and geriatric long-term care services. Unfortunately, as the
20 experiences of Plaintiffs Valentini, Moraru, Doe, and Romine detailed below
21 demonstrate, the system has been designed not to address the needs of the most
22 severely disabled veterans, and seriously disabled veterans cannot meaningfully
23 access the medical and residential care services to which they are entitled under the
24 VHA benefits program.

25 85. The 953-bed James Wadsworth Hospital provides inpatient and
26 outpatient services to veterans. Inpatient medical services include all acute medical,
27 surgical, rehabilitative, and mental health care for veterans in the Greater Los
28 Angeles area. The hospital is also the primary referral center for cardiology,

1 neurosurgery, and radiation oncology. Outpatient services provided at the hospital
2 include primary care exams, services provided by clinical specialists, immunizations,
3 and preventative screenings.

4 86. VA GLA operates a skilled geriatric nursing facility on the WLA
5 Campus. The 352-bed Community Living Center provides supportive, rehabilitative,
6 and hospice services to elderly veterans, although only 226 of the beds are currently
7 operating.

8 87. VA GLA provides long-term rehabilitative care on the WLA Campus at
9 the West Los Angeles Polytrauma Site. This facility is dedicated to patients with
10 injuries to more than one physical region or organ system resulting in physical,
11 cognitive, psychological, or psychosocial impairments and functional disabilities.
12 Services are provided primarily on an outpatient basis.

13 88. VA GLA offers psychiatric, mental health, and substance abuse services
14 at several facilities on the WLA Campus. Treatment programs are available for
15 alcohol and substance abuse, PTSD, and serious mental illness. VA GLA offers
16 some of these services on an outpatient basis, including counseling, group sessions,
17 medication management, and a day treatment center.

18 89. VA GLA offers no permanent supportive housing to disabled veterans.
19 Temporary shelter services are offered through the 321-bed Domiciliary Residential
20 Rehabilitation and Treatment Program ("Domiciliary"). This program provides
21 temporary shelter beds along with medical, psychiatric, and substance abuse
22 treatment, as well as other therapeutic services. A substantial number of the beds are
23 dedicated to programs focused on substance abuse recovery and not tailored to
24 address serious mental health needs. Veterans are assigned to a Domiciliary bed on a
25 short-term or intermediate basis; the length of stay ranges from 30 days to a
26 maximum of two years. The Domiciliary is structured so that residents generally
27 live in a barracks-style room with two or three other residents, even if they suffer
28 from a mental health condition that makes it difficult or impossible to function in

1 such tight quarters with other people, particularly strangers. Although a limited
2 number of single rooms are available (fewer than 20), veterans generally must "earn"
3 their way into in a single room by maintaining compliance with the treatment
4 program over a period of time. Additionally, veterans assigned to a Domiciliary bed
5 are discharged if they use alcohol or drugs and may be discharged for not fully
6 participating in treatment or group sessions mandated by the Domiciliary staff, or for
7 failing to make sufficient progress toward treatment goals.

8 90. In total, VA GLA operates facilities on the WLA Campus with
9 approximately 1500 beds, of which more than 1150 are dedicated to inpatient
10 hospital care or skilled nursing care for elderly veterans. VA GLA stated in a
11 January 2011 report, however, that it currently operates only 740 beds on the WLA
12 Campus, including 261 acute hospital beds, 158 nursing home beds, and 321
13 Domiciliary beds. Additionally, VA GLA stated in its 2010 Annual Report that it
14 operates only 770 beds, including 226 acute hospital beds, 188 skilled nursing home
15 beds, 52 non-acute hospital beds, and 304 Domiciliary beds. By any available
16 measure, VA GLA presently maintains no more than 321 beds, through the
17 Domiciliary, that could provide housing to veterans who suffer from serious mental
18 illness and therefore need housing to access and benefit from services in a
19 meaningful way. These beds, however, are not made available as permanent
20 supportive housing, but rather are used as temporary shelter with limitations on
21 eligibility that often exclude homeless veterans with serious disabilities. Moreover,
22 of these beds, a substantial number are set aside for substance abuse treatment
23 programs, and these programs are not designed to provide services sufficient or
24 appropriate to address serious mental health conditions.

25 91. In addition to the beds operated by VA GLA, several residential
26 programs are operated by third parties on the WLA Campus, including a geriatric
27 care facility operated by the State of California and shelter and residential treatment
28 programs operated by two non-profit organizations.

1 92. The Veterans Home of California, which opened on the WLA Campus
2 in 2010, is run by the State of California and provides nursing care for veterans over
3 age 62. The 396-bed home includes an 84-bed elderly residential care facility, a
4 252-bed skilled nursing facility, and a 60-bed memory care unit designed for
5 Alzheimer's and dementia patients. At present, this facility is operating at less than
6 10 percent of its maximum capacity.

7 93. The Haven is an emergency housing program run by the Salvation
8 Army of Southern California on the WLA Campus. Its goal is to provide housing
9 and support services to 225 homeless or at-risk veterans. The Haven includes five
10 programs: short-term housing for 35 veterans in Alpha Center, transitional housing
11 focused on substance abuse recovery for 95 veterans at Victory Place, supportive
12 housing for 15 female veterans at Naomi House, a board and care facility for 90
13 mentally ill veterans at Exodus Lodge, and senior housing for 25 male veterans age
14 60 and older.

15 94. New Directions, Inc. operates two residential programs on the WLA
16 Campus. The New Directions' Regional Opportunity Center serves 156 veterans,
17 including 24 beds for detoxification, 24 beds for "Shelter Plus Care" transitional
18 housing for elderly or disabled veterans, and 108 beds for residential substance abuse
19 and mental health programs. The New Directions North provides substance abuse
20 treatment and mental health services in a smaller setting for up to 50 homeless
21 veterans with co-occurring mental illnesses.

22 95. As with the VA GLA-run Domiciliary, virtually all of the emergency
23 and transitional beds operated by the non-profit providers on the WLA Campus
24 require residents to share rooms. Moreover, although the services provided at these
25 facilities are appropriate and necessary for some veterans and the availability of
26 emergency and transitional beds on the WLA Campus is important for some veterans,
27 these programs are neither designed nor intended to meet the needs of veterans who
28 suffer from severe mental disabilities or brain injury. Finally, by their nature as

1 short-term and transitional beds, these programs cannot provide the long-term
2 stability that veterans with severe disabilities require in order to meaningfully access
3 medical and therapeutic services available on the WLA Campus.

4 96. The Salvation Army also operates the 40-unit Westwood Transitional
5 Village on the WLA Campus. Only homeless families are eligible. Approximately
6 150 individuals live in the Village, with families of veterans making up 40 percent of
7 the residential population. The Village is a supportive housing program that
8 provides residents with counseling, case management, educational training,
9 employment placement assistance, medical clinic services, and childcare.

10 97. In addition to the residential beds available on the WLA Campus, VA
11 GLA has contracted with private providers within its service area to secure around
12 1,200 transitional housing beds for veterans. The duration of these programs is
13 between three and eighteen months. VA GLA also contracts with private providers
14 in the community for short-term residential treatment (detoxification) beds. Veterans
15 in these programs have to travel to the WLA Campus or another VA GLA service
16 location if they wish to access services from VA GLA.

17 98. VA GLA also reported that in fiscal year 2010 it received 550 housing
18 subsidy vouchers for veterans. A 2009 report prepared by VA GLA reflected that
19 there were only 1,317 permanent housing beds accessible to veterans in its service
20 area that are "veteran-specific." These beds are not located near the WLA Campus,
21 so disabled veterans, including veterans with serious mental disabilities or brain
22 injuries, who are placed in these beds must travel to the WLA Campus or another
23 VA GLA service location if they wish to access services from VA GLA.

24 99. In short, VA GLA does not offer permanent housing to disabled
25 veterans on the WLA Campus, where the actual medical and other therapeutic
26 services for veterans are delivered. Instead, VA GLA offers only a limited number
27 of emergency or transitional beds and time-limited residential treatment beds on the
28 WLA Campus with qualification requirements that often exclude disabled veterans

1 who are chronically homeless. To the extent that veterans have access to additional
2 transitional housing beds through VA GLA contracts with off-site providers and to a
3 limited stock of permanent housing through VA GLA's housing voucher program,
4 these beds are not located near the WLA Campus and other VA GLA facilities where
5 VHA benefits are offered.

6
7 **Plaintiffs Have Been Denied Access to the VHA Benefits**
8 **Offered by VA GLA Solely by Reason of Their Disabilities**

9 100. Although Defendant Shinseki and other senior officials within DVA and,
10 more specifically, Defendant Beiter and other senior officials within VA GLA, are
11 aware that a substantial number of veterans eligible for VHA benefits within the VA
12 GLA service area suffer from severe mental disabilities or brain injuries that require
13 that they have housing in order to meaningfully access effective services, the VHA
14 benefits program offered through VA GLA effectively excludes these veterans or
15 creates substantial and, in some cases, insurmountable barriers to accessing
16 necessary medical, mental health, and other services to which these veterans are
17 entitled under the VHA benefits program.

18 101. As the experiences of Plaintiffs reveal, Defendant Beiter has decided
19 not to serve the most severely disabled veterans by structuring and designing the
20 existing VHA benefits program at VA GLA in a way that does not provide the
21 services necessary to treat Plaintiffs' serious mental disabilities, while providing
22 services that meet the needs of non-disabled veterans and less seriously disabled
23 veterans. Defendant Shinseki has knowingly allowed this situation to continue and
24 refused to exercise his authority to remedy the discrimination. Additionally, as a
25 result of Defendant Beiter's actions and Defendant Shinseki's refusal to act, severely
26 disabled veterans are denied meaningful access to VHA benefits solely by virtue of
27 their disabilities.

1 **Greg Valentini**

2 102. Plaintiff Greg Valentini was born in Hawaiian Gardens and grew up in
3 Southern California. He is currently 33 years old. He served multiple combat tours
4 in Afghanistan and Iraq. Since coming home, he has been diagnosed with severe
5 PTSD and has struggled with homelessness, substance abuse, and thoughts of suicide.

6 103. Mr. Valentini grew up in Long Beach and Lakewood. He went to
7 Lakewood High School, where he played baseball and basketball. His father, a
8 Marine, instilled in him a sense of duty and service. After working with the
9 Lakewood Department of Parks and Recreation and several other odd jobs, Mr.
10 Valentini decided to join the Army to finance his higher education and enlisted in
11 May 2000.

12 104. Mr. Valentini received basic training in Fort Benning, Georgia, and was
13 selected for further training at Fort Bragg, North Carolina. He was assigned to the
14 82nd Airborne Division and then to the 101st Airborne Division. In October 2001,
15 he was deployed to Afghanistan as part of the initial assault on the Taliban and al-
16 Qaeda after September 11.

17 105. Mr. Valentini's first mission was to take control of the Taliban-held
18 airport at Kandahar, which involved heavy combat. Many of his fellow soldiers
19 were killed. He also witnessed a number of civilian deaths and was tasked with
20 transporting the dead bodies of the civilians.

21 106. In February and March of 2002, Mr. Valentini's unit was part of
22 Operation Anaconda in the Tora Bora Mountains, searching for Osama bin Laden
23 and other elements of the al-Qaeda and Taliban leadership. He took part in
24 significant ground fighting, under nearly constant sniper fire and mortar
25 bombardment. Again, he witnessed the gruesome deaths of numerous civilians,
26 including children.

27 107. In February 2003, Mr. Valentini's unit was taken out of Afghanistan
28 and reassigned as part of the invasion force in Iraq. The unit's assignment was to

1 clear, secure, and hold certain key areas near Karbala while other forces moved
2 toward Baghdad. He again experienced heavy combat, involving the deaths of
3 soldiers and civilians.

4 108. Although his tour of duty was slated to end in March 2003, Mr.
5 Valentini was "stop-lossed" and continued to serve in combat operations in Iraq for
6 several more weeks. He was honorably discharged in May 2003.

7 109. In recognition of his service, Mr. Valentini has received the Army
8 Commendation Medal, the Army Achievement Medal, the National Defense Service
9 Medal, the Armed Forces Expeditionary Medal, the Army Service Ribbon, and the
10 Expert Marksmanship Qualification Badge with Rifle Bar. As a consequence of his
11 service and experiences in Afghanistan and Iraq, he also developed what was later
12 diagnosed as a severe case of PTSD.

13 110. On returning to life as a civilian, Mr. Valentini moved back in with his
14 father in the Long Beach area and tried to attend Long Beach City College on the
15 "G.I. Bill." He studied the administration of justice with the goal of becoming a
16 police officer, but he had trouble relating to his classmates and controlling his
17 emotions. When someone would comment on the Iraq or Afghanistan wars, for
18 example, he became uncontrollably angry, leading to several altercations.

19 111. Mr. Valentini felt constantly "on alert," as if he was in combat. He
20 could not focus on conversations, instead paying attention to his surroundings, as if
21 expecting an ambush. He would repeatedly get up to check if doors were locked and
22 stare compulsively at passing cars to see if anything seemed suspicious. He was
23 paranoid that passers-by were investigating him in some way. Because he felt that
24 he had to be constantly vigilant to protect himself and the people around him, he had
25 trouble sleeping. When he managed to sleep, he had graphic nightmares about things
26 he witnessed during his wartime service.

27 112. Mr. Valentini soon began to think about suicide as a way to escape the
28 constant stress of feeling that he never left the combat zone. Three or four times a

1 week, he spent hours thinking about where and how to kill himself. As he became
2 angrier, the suicidal thoughts increased in frequency. He told those closest to him
3 that he wished he had died in Afghanistan or Iraq; coming home in a flag-draped
4 coffin, he said, would have been better than coming home to a community that did
5 not understand what he was going through.

6 113. In order to deal with the stress, Mr. Valentini started using
7 methamphetamine. The methamphetamine kept him awake, and kept his mind away
8 from thoughts of war. It also made him so exhausted that he was able to fall asleep
9 instead of lying awake thinking about what he saw in Iraq and Afghanistan, and
10 when he slept, he experienced fewer nightmares. Eventually his father ordered him
11 to go to the DVA hospital in Long Beach. A doctor there diagnosed Mr. Valentini
12 with severe PTSD.

13 114. Mr. Valentini managed to remain sober for about 16 months, from 2004
14 to 2006, and continued living with his father during this time. Eventually, however,
15 he again turned to methamphetamine to cope with the recurring violent thoughts and
16 stress, and he left his father's house. In 2006, he began sleeping in a tent near the
17 Long Beach Airport. He collected cans, and paid \$1 to shower at the YMCA. When
18 he ran out of money he ate discarded fast food he found on the street, first wiping off
19 the ants, and bathed in the lake by a golf course. He learned which public restrooms
20 he could use in the area. He stole from businesses to pay for the drugs he used to
21 cope with his stress and to take his mind off a reality that embarrassed him.
22 Sometimes other homeless veterans joined him by the airport, sleeping nearby.

23 115. Mr. Valentini continued living on the streets until 2008, when, after
24 several rainstorms, his father agreed to let him move back into the house. When he
25 began using methamphetamine again after four months, however, his father asked
26 him to leave. Mr. Valentini was again homeless, and aside from a few short respites,
27 has been homeless since. He was briefly admitted to the Domiciliary but felt that the
28 staff seemed more interested in finding reasons to kick him out than helping him,

1 which made him more anxious and stressed. In the Domiciliary, he was forced to
2 share a room with three other veterans also struggling with addiction and who also
3 had difficulty interacting with other people. One of those roommates told Mr.
4 Valentini that his brother could supply him with methamphetamine, which made it
5 easier for Mr. Valentini to relapse. That roommate soon died after overdosing on
6 heroin.

7 116. Since October 2008, Mr. Valentini has spent time on the streets, in
8 shelters, in his father's house, in a girlfriend's house, and in jail for petty theft or
9 commercial burglary to obtain money for drugs. He has difficulty managing his
10 PTSD symptoms in these circumstances; he feels constantly in "combat mode,"
11 always on alert, continuously anxious and tense. As a condition of his probation, he
12 was sent to a transitional housing and treatment facility operated by a non-profit
13 organization, where he is now staying. He is currently clean, although he has
14 experienced several relapses.

15 117. Mr. Valentini is concerned about what will happen after his probation
16 ends and he must leave his transitional housing placement. He wants to concentrate
17 on treating his PTSD and overcoming his addiction, but he finds it difficult to do so
18 without stable housing. Mr. Valentini also finds it difficult to take public
19 transportation, because riding with a group of strangers triggers his PTSD. Prior to
20 taking the bus to the WLA Campus to access treatment, he must spend a half-day or
21 more mentally preparing himself for the trip. Once on the bus, he feels that he must
22 station himself near an exit and maintain a visual map of where the location of
23 everyone and everything. On numerous occasions he has felt so overwhelmed that
24 he had to get off the bus before reaching his destination, causing him to miss
25 important appointments.

26 118. Mr. Valentini's goal is to complete his college degree and obtain a
27 Masters in Social Work at USC, where there is a military social work program. He
28 is currently taking classes at Los Angeles City College; he sits in the back of the

1 classroom, near the exit, where he feels safest. He wants to help other combat
2 veterans avoid what he has gone through. Without stable housing, however, Mr.
3 Valentini feels unable to manage his PTSD and addiction effectively. He continues
4 to worry that he will be on the streets again soon.

5 119. Since coming home after his service in Iraq and Afghanistan, Mr.
6 Valentini has met and befriended many other veterans with serious PTSD who have,
7 like him, medicated themselves with street drugs. He knows that those drugs bring
8 only temporary relief, but he finds it difficult to address his PTSD without a safe,
9 stable place to live.

10

11 **Adrian Moraru**

12 120. Plaintiff Adrian Moraru is 37 years old. He was born in Romania and is
13 a legal permanent resident of the United States. After his service in Iraq as a Marine,
14 he was diagnosed with PTSD and bipolar disorder.

15 121. Mr. Moraru grew up in Philadelphia, Pennsylvania. He enlisted in the
16 Marines in 1999 at age 26 and trained at Parris Island. He was stationed at
17 Twentynine Palms, California, and served in Okinawa before being sent to Iraq as
18 part of the initial invasion force for OIF.

19 122. In March 2003, Mr. Moraru's unit encountered a chemical pool while
20 on a convoy to Baghdad. He and his fellow Marines were not wearing chemical
21 warfare protection gear and were exposed to the chemical for 10 to 15 minutes.
22 After his unit reached Baghdad, they were sent to Karbala. In April 2003, while
23 assigned to guard an Iraqi bank, he stated in a media interview that he always had to
24 remain "on alert" and needed eyes in the back of his head. He commented,
25 "Sometimes, it seems like I survived the war and I could be shot in the back by a 9-
26 year-old. It was almost easier during the war. At least you knew where the enemy
27 came from. Here, it could be anyone." When his term of service ended after
28 returning from Iraq in June 2003, he held the rank of corporal.

1 123. Mr. Moraru lived in Las Vegas until the summer of 2005, when he
2 moved to Philadelphia to pursue an employment opportunity. He worked for several
3 months installing satellite dishes for Direct TV and lived with his parents.

4 124. One day in August 2005, Mr. Moraru suddenly experienced
5 uncontrollable rage and went into his mother's living room and destroyed the
6 contents of the room while his mother hid in the basement. After that incident, he
7 spent a week or two at a mental hospital.

8 125. Mr. Moraru stayed with his sister in Philadelphia for several weeks after
9 leaving the hospital, but she had young children and eventually asked him to leave.
10 Because his parents refused to let him back into their house, he moved into a car
11 parked on the street in front of the house, sleeping there for about six months,
12 through the winter, until around March 2006. During this time he developed boils on
13 his hand and groin that he believes are a result of his exposure to the chemical pool
14 in Iraq. Although he was in tremendous pain, his paranoia prevented him from
15 seeking medical treatment. No one from DVA contacted Mr. Moraru or his family
16 during this time, or attempted to connect him to any services that might help him.

17 126. Because Mr. Moraru continued to argue with his father, his father no
18 longer allowed him to sleep in the car. Mr. Moraru flew to Las Vegas, where two of
19 his friends from the Marines lived. One of the friends arranged a job for him at a 7-
20 Eleven. Due to his mental state, however, he was unable to work more than one pay
21 period. He took the \$430 he earned and took the bus to San Diego, though he had no
22 contacts in the city. After exhausting the last of his money in less than a week, he
23 began collecting cans and eating out of trash bins around Ocean Beach. He stayed in
24 San Diego for about eight months. During that time he lost his ID and his green card
25 expired, and he had no money to renew it. He also developed a large boil on his
26 back that he believes is a result of exposure to the chemicals in Iraq. He stopped
27 drinking after getting the boil.

28 127. After eight months in San Diego, Mr. Moraru's friend in Las Vegas

1 wired him enough money to take the train to Los Angeles. Things deteriorated
2 further upon his arrival there. He stopped collecting cans and obsessively marched
3 up and down Wilshire Boulevard between downtown and the beach, walking up to
4 20 miles a day and collapsing to sleep when he could not walk further.

5 128. Mr. Moraru eventually stopped marching in Beverly Hills. One day, he
6 was struck with the impulse to pick up a chain that was used to secure chairs on a
7 restaurant patio. He does not know what possessed him to take the chain. Four
8 police officers approached him and told him to drop it. When he stood up with a
9 stick in his hand, they subdued and arrested him. During his subsequent arrest and
10 booking, he told everyone that he was God.

11 129. As a part of a plea deal, Mr. Moraru was released for 30 days served in
12 county jail and received three years probation. He then walked to Westwood and
13 slept behind the Equinox health club for about three months. During this time,
14 because he had stopped drinking, he was able to save \$160.

15 130. Around August 2009, Mr. Moraru went back to Las Vegas, where his
16 friend helped him get a ticket to Philadelphia. He moved back in with his parents,
17 but had trouble staying in a house with other people, and they again asked him to
18 leave. He then moved his remaining belongings from his parents' house to a lot
19 behind a Wawa convenience store, where he slept. He told passers-by that he owned
20 the store. When the police forced him to leave, he moved to another Wawa location.
21 He does not know what possessed him to stay near Wawa stores.

22 131. After some time, Mr. Moraru's parents allowed him to move into their
23 garage. His sister helped him renew his green card, because he could not afford the
24 \$375 renewal fee. He never went to DVA facilities in Philadelphia, because he did
25 not believe there was anything wrong with him.

26 132. After managing to save \$90, Mr. Moraru flew back to Los Angeles in
27 August 2010 and again slept behind the Equinox. The next month he suffered a
28 violent seizure. Several other homeless residents of the area, whom he had gotten to

1 know, suggested he visit the WLA Campus. After arriving there early in the
2 morning, he waited hours to be seen and saw other vets with mental disabilities leave
3 because they could not wait any longer. He briefly saw a doctor who again told him
4 to sit and wait. After waiting until 4:30 p.m., he left.

5 133. Mr. Moraru later visited the WLA Campus again and forced himself to
6 wait for his name to be called. He received a physical, was referred to see a
7 psychiatrist, and was then placed in The Haven, where had to share a room with
8 three other residents. Moreover, treatment at The Haven focused on alcoholism and
9 drug addiction, but he had stopped drinking and did not use drugs. VA GLA staff
10 did not inform him of other options, if any existed. After ten days at The Haven, he
11 assaulted another resident and was forced to leave the program.

12 134. He again became homeless, this time in Abbot Kinney park in Santa
13 Monica, and his condition continued to deteriorate. He spent his entire day cleaning
14 up the park, picking up cigarette butts and other garbage.

15 135. Mr. Moraru continued to try to attend his appointments at the WLA
16 Campus with Dr. McKenna, a psychiatrist. She diagnosed him with PTSD and
17 bipolar disorder. He saw Dr. McKenna about once every month to manage his
18 seizure medication. He received no medication for his PTSD or his bipolar disorder.

19 136. At one point, a VA GLA employee asked Mr. Moraru if he wanted
20 housing. He replied that he did not need housing because he was "living" in Santa
21 Monica. His mental condition prevented him from seeing anything wrong with
22 sleeping in the park and picking up garbage all day. In addition, his bad experience
23 at The Haven left him with a negative impression of housing offered through VA
24 GLA.

25 137. About six weeks ago, Mr. Moraru picked up some pipes in the park that
26 he thought were garbage. Someone told him to put them down. He became angry,
27 told the man that he would beat him, and threw the pipes in a dumpster. The next
28 day, he was arrested and charged with robbery and criminal threat. Mr. Moraru

1 accepted a plea deal to participate in a transitional housing program run by a non-
2 profit organization in Hollywood for one-year as a condition of probation. He has
3 been staying there for about a month.

4 138. Mr. Moraru wants a private apartment that will allow him to go to the
5 WLA Campus for appropriate treatment and medications. He does not know what
6 he will do when he finishes the transitional housing program, and he is afraid that if
7 he has to leave the program he will have nowhere to go but back to living on the
8 streets, where his mental health will continue to deteriorate.

9
10 **Jane Doe**

11 139. Plaintiff Jane Doe was born in Pasadena, California. She is a veteran
12 and is currently homeless. VA GLA psychiatrists have diagnosed her with PTSD
13 related to military sexual trauma.

14 140. Ms. Doe's family has deep ties to the military, and five of her six
15 brothers served in the military. Her brother Donald was a Marine and served in
16 Vietnam. He died in 2005. Her brother George served in Vietnam and was a POW.
17 He used drugs after the war and died in 2005. Her brother Bill served seven tours in
18 Vietnam. He has addiction issues and a 100 percent service-connected disability.
19 Her brother Phillip served in the Gulf War and now has PTSD. He developed
20 asthma from CS gas exposure and now uses drugs. Like Ms. Doe, he is homeless
21 and lives in Los Angeles. Her brother Hamilton served in the Gulf War.

22 141. Ms. Doe joined the military after obtaining her GED at the age of 16,
23 planning to make a career of it. In 1974, she went to Fort Jackson, South Carolina
24 for basic training. She then completed Advanced Individual Training in Radio
25 Communications at Fort Dix, New Jersey. In the barracks, she was attacked and
26 raped by a group of women. She was raped again by a mess sergeant in the back seat
27 of military vehicle while another man looked on.

1 142. In December 1974, Ms. Doe was sent to Germany and worked as a
2 radio operator. She returned to the United States, was briefly stationed at Fort Sam
3 Houston in Texas, and was then sent back Germany. While in Germany, she was
4 again sexually assaulted by a group of men. After that incident, she was hospitalized
5 in a psychiatric care unit. Because she felt ashamed, she did not report the sexual
6 assaults at the time.

7 143. Ms. Doe's mother became ill in 1980, and she received a humanitarian
8 discharge to help take care of her. She obtained a job with Bank of America in the
9 collections department, but quit because of job circumstances that exacerbated her
10 PTSD symptoms. She then held various security jobs, but had difficulty keeping
11 them because she frequently lost her temper, which is a consequence of her PTSD.
12 During this time, however, she did not realize that she suffered from PTSD.

13 144. In 1997, Ms. Doe lost her security job, and one of her brothers drove her
14 to the WLA Campus because she was having a mental breakdown. She was
15 immediately committed to the psychiatric ward and placed on suicide watch. This
16 was the first time she received services from DVA.

17 145. Ms. Doe was diagnosed with PTSD secondary to military sexual trauma.
18 Because there was no women's clinic at VA GLA at the time, she was transferred to
19 the Domiciliary. At that time, there were only five or six other women there, but she
20 had to share a room with three other women. She was in constant fear of being
21 attacked. When she was able to sleep, she would wake up with nightmares.

22 146. There were no women's therapy groups at the Domiciliary, so Ms. Doe
23 had to participate in group sessions for addiction, even though she had no addiction
24 issues. The sessions did not help with her PTSD, because the sessions focused only
25 on addiction and the facilitators never discussed flashbacks or nightmares, which
26 were two of her main problems. Ms. Doe also met once a week with a psychologist,
27 Dr. Vivian Gold, who worked well with her. During these sessions, she was able to
28 talk about her PTSD symptoms. She eventually was transferred to a single room,

1 which lessened her anxiety and fear considerably. As a result of her sessions with Dr.
2 Gold and having a safe, secure place to live, Ms. Doe felt like she was starting to
3 make progress.

4 147. But three or four months later, a board at the VA GLA created a
5 discharge summary. Ms. Doe knew that she was not yet in a position to live
6 successfully on her own. She told the board that she was still having intense
7 flashbacks about her trauma, but they nonetheless forced her to leave sometime in
8 1999.

9 148. When Ms. Doe left the Domiciliary, there were no transitional services
10 so she was told to go to Skid Row. She moved into a room at the Boyd Hotel for
11 \$250 per month. She never felt safe there, because she could access a bathroom only
12 by leaving her room and walking down a public hallway and there were people
13 living in cardboard boxes around the Boyd Hotel and lots of open drug use in and
14 around the hotel. Although she tried to continue seeing Dr. Gold, VA GLA told her
15 that Dr. Gold worked only with people living at the Domiciliary. She instead
16 received psychological services at the mental health day treatment building on the
17 WLA Campus.

18 149. Being forced to leave the WLA Campus for a Skid Row hotel was a
19 major setback in Ms. Doe's treatment. She did not feel secure even in her own bed
20 and began having difficulty sleeping and experiencing acute anxiety. She had to take
21 the bus to the WLA Campus for counseling, but traveling on the bus was difficult
22 because her PTSD caused her extreme anxiety when she was around crowds of
23 strangers. Consequently, traveling to the WLA Campus to access mental health
24 services was a problem.

25 150. Ms. Doe then moved back to Pasadena, but when her brother kicked her
26 out of the house, she lived out of her car. She continued to suffer from severe PTSD
27 symptoms, because she had not received appropriate treatment or support after she
28 was discharged from the Domiciliary. She did not know where to turn for help.

1 151. In 2008, Ms. Doe tried to go back to the Domiciliary but was told it had
2 no programs for women with PTSD. Instead, she was referred to The Haven, a
3 transitional shelter on the WLA Campus. She stayed at Naomi House, a women's
4 shelter on the third floor of an otherwise all-male building. As a rape victim, it was
5 very difficult for her to leave and to enter the building with all the men around.
6 Additionally, there were no programs to meet her PTSD needs.

7 152. Eventually, the Domiciliary began a program for women with PTSD,
8 and Ms. Doe was accepted. By the time she transferred there, however, VA GLA
9 had replaced the PTSD program with an addiction recovery program. When she and
10 a few other women with PTSD who enrolled in the program complained, VA GLA
11 simply changed the title to a "recovery" program without changing the content or
12 therapeutic approach. The mandated group sessions focused exclusively on drug and
13 alcohol addiction, and her therapist was a drug addiction specialist, with no training
14 in military sexual trauma or PTSD. Her third session with the addiction specialist
15 focused on discharge planning, which made her feel as though she was being pushed
16 out the door as soon as she had arrived, regardless of whether she was doing better or
17 receiving the care she needed.

18 153. The Domiciliary tried to discharge her after only four months, but Ms.
19 Doe persuaded the staff to extend her stay by two months. She had difficulty
20 concentrating on her treatment because she worried about where she would live after
21 the two-month extension ended.

22 154. Ms. Doe was eventually discharged from the Domiciliary because she
23 did not take a mandatory urine-analysis test. She simply forgot to show up for the
24 test, which should not have been surprising to the staff because her records reflect
25 that short-term memory loss is one symptom of her PTSD.

26 155. Ms. Doe told the staff that she did not feel safe on the streets and had
27 not made enough progress to feel stable. The only options she was offered were a
28 shared room at New Directions or psychiatric hospitalization, and she rejected the

1 former because of the shared-room requirement and the latter because she did not
2 believe it would be helpful. About an hour before she was supposed to leave, she
3 was handcuffed and taken to the mental lock-up ward, where she stayed overnight on
4 a psychiatric hold. The doctors at the ward discharged her the next day because she
5 did not meet the criteria for involuntary commitment. VA GLA referred her to the
6 Salvation Army Bell Shelter, a large dormitory-style homeless shelter, but her PTSD
7 prevented her from staying in such a setting.

8 156. Two days later, Ms. Doe learned that a slot opened for her at a
9 specialized DVA program in Menlo Park for women who experienced sexual trauma.
10 She was denied admission, however, because she did not meet the admission
11 requirement of having a stable place to live after completion of the program.

12 157. Ms. Doe is currently living with her sister-in-law and continuing to see
13 a therapist at the WLA Campus. Her unsettled living situation exacerbates some of
14 her PTSD symptoms, which undermines her treatment. She continues to have
15 flashbacks and nightmares and is embarrassed when people see her with those
16 symptoms. When she does not have a private space, she tries to repress her trauma
17 so the symptoms do not surface. She knows this is not healthy and makes it harder
18 for her to be open in her treatment sessions.

19 158. Ms. Doe wants to find her own place that is safe and secure and will
20 provide her ready access to her doctor at the WLA Campus so that she can receive
21 the treatment she needs. She is trying to find a place to live in Los Angeles, but it
22 has been difficult to find an apartment because her credit history is poor after being
23 homeless for four years. VA WLA has not offered her any permanent housing.

24
25 **Chris Romine**

26 159. Plaintiff Chris Romine grew up in Madera, California. At 16 he was
27 shot in a drive-by shooting that severed his femoral artery. He graduated from high
28 school in Madera and then worked in construction.

1 160. In order to seek a better life, Mr. Romine joined the Army at age 19. He
2 was trained to be a military police officer at Fort McClellan, Alabama. Following
3 training, he was assigned to Fort McClellan itself. Part of his assignment was to
4 work as an undercover military investigator, assigned to purchase drugs being sold
5 on the base. In the course of that duty he was exposed to drugs and drug use for the
6 first time. He later received Special Reaction Team (SRT) training at Fort Polk,
7 Louisiana, similar to that provided to civilian SWAT police officers.

8 161. In March 2003, Mr. Romine's unit was sent to Iraq as part of the initial
9 invasion force in OIF. His first assignment was guarding prisoners of war at Camp
10 Bucca and providing escort to convoys between Camp Bucca and Basra. In the
11 course of his convoy protection duties, he saw two close friends die in vehicles in
12 front of his. One was crushed by his vehicle, and the other burned to death.

13 162. Mr. Romine was honorably discharged in 2003 and returned to the
14 United States. He remained very troubled by what he experienced and began, for the
15 first time in his life, to take hard drugs, primarily illicitly obtained Vicodin and
16 Oxycodone, in order to dull his memories and to become numb to his daily life.

17 163. Unable to adjust to civilian life, Mr. Romine reenlisted in the U.S. Army
18 in 2005. Given a choice of either a substantial monetary reenlistment bonus or his
19 choice of assignments, he chose to be assigned to the Special Warfare Center at Fort
20 Bragg, North Carolina, for training as a special operations soldier. A mistake by his
21 recruiter resulted in his being rejected from the Special Warfare Center because he
22 had not completed a necessary screening course. He was then reassigned to a
23 military police brigade attached to the 108th Airborne Division and deployed back to
24 Iraq.

25 164. Once back in Iraq, Mr. Romine continued to treat what was later
26 diagnosed as PTSD by self-medicating with drugs, primarily Percoset, which he
27 bought from Army medics. In addition to convoy protection and the constant
28 heightened vigilance that it required, his unit was assigned to "clean up duty"

1 following roadside bomb attacks on U.S. forces. This duty included dealing with the
2 body parts and gore that remained after the dead and wounded U.S. soldiers were
3 removed. In addition to using drugs, Mr. Romine began drinking heavily, in order to
4 cope with his disability. On two instances, he was found drunk on duty. As a result,
5 he was discharged again in 2007, this time under other than honorable conditions.

6 165. Mr. Romine returned to Huntington Beach to live with his uncle, also a
7 military veteran. Seeing his condition, his uncle insisted that he go to the Long
8 Beach DVA hospital for treatment, which he did. He was drug free for a time, but
9 did not get effective treatment for his PTSD and relapsed. He was homeless on the
10 streets of Santa Monica and West Los Angeles for a time. Since that time, he has
11 tried to obtain housing and services through nearly every facility available at the
12 WLA Campus, but he has not been able to obtain permanent housing.

13 166. Mr. Romine continued to experience intermittent periods of drug use
14 and sobriety, including a period of about four months living with other veterans in a
15 street encampment near the WLA Campus. A variety of petty offenses resulted in
16 his incarceration in the jails of both Los Angeles and Orange Counties. During his
17 last incarceration, a DVA employee arranged for his placement at a transitional
18 housing program. This is the most suitable living arrangement Mr. Romine has had
19 so far, but it is still a temporary living arrangement. Until he achieves some certainty
20 in his housing and living arrangements over the longer term, Mr. Romine does not
21 believe that he will be able to address either his PTSD or the addictions that resulted
22 from it.

23
24 **Permanent Supportive Housing Is a Reasonable Accommodation to Ensure**
25 **Plaintiffs Have Meaningful Access to Services to Which They Are Entitled**

26 167. Plaintiffs' experiences demonstrate that Defendants have discriminated
27 and will continue to discriminate against Plaintiffs and other veterans suffering from
28 serious mental disabilities solely by virtue of their disabilities. Defendants have

1 denied Plaintiffs meaningful access to services offered by VA GLA in numerous
2 ways, which include, but are not limited to:

- 3 • Imposing conditions for access to or continued participation in programs or
4 services that Plaintiffs cannot satisfy as a result of symptoms or characteristics
5 of their disabilities;
- 6 • Providing services or treatment in settings that Plaintiffs are unable to access
7 as a result of symptoms or characteristics of their disabilities;
- 8 • Failing to provide sufficient assistance to Plaintiffs when their symptoms or
9 characteristics of their disabilities prevent them from identifying available
10 services from which they would benefit, or applying for or otherwise
11 navigating the intake, screening, or referral processes to access those services;
- 12 • Failing to provide treatment and support that is necessary for the appropriate
13 treatment of Plaintiffs' disabilities, while providing appropriate treatment and
14 support to veterans who do not have disabilities or who suffer from different
15 disabilities; and
- 16 • Failing to provide the reasonable accommodation of permanent supportive
17 housing to those veterans who, by reason of their mental disabilities, are
18 unable to meaningfully access appropriate treatment without it.

19 168. Scholars and researchers have reached the conclusion that permanent
20 supportive housing is the only approach that consistently allows severely disabled
21 individuals like Plaintiffs to access a broad array of social services, including
22 medical care and mental health services.³⁸ Accordingly, offering permanent
23 supportive housing is a necessary and reasonable accommodation to ensure that
24 Plaintiffs and other veterans with serious mental disabilities and brain injuries can
25 meaningfully access the VHA benefits that they are entitled to receive from VA

26 ³⁸ See generally U.S. DEP'T OF HEALTH AND HUMAN SERV., MEDICAID AND PERMANENT
27 SUPPORTIVE HOUSING FOR CHRONICALLY HOMELESS INDIVIDUALS: LITERATURE SYNTHESIS AND
28 ENVIRONMENTAL SCAN (2011), available at <http://aspe.hhs.gov/daltcp/reports/2011/ChrHomlr.pdf>
(summarizing dozens of published and unpublished studies demonstrating effectiveness of
permanent supportive housing and its economic benefits).

1 GLA.

2 169. As noted above, numerous studies have demonstrated that permanent
3 supportive housing is cost-effective, underscoring its reasonableness as an
4 accommodation for seriously disabled veterans. In addition to those studies, which
5 measure cost-savings across agencies, several studies have focused on the net
6 economic impact only for the agency providing the permanent supportive housing.
7 This research demonstrates that systems like VA GLA that provide medical care,
8 substance abuse treatment, and emergency and transitional beds are likely to achieve
9 substantial cost savings as a result of moving to a permanent supportive housing
10 model for chronically homeless clients, for several reasons. First, once placed in
11 permanent supportive housing, tenants' reliance on emergency shelters diminishes to
12 almost zero.³⁹ Second, there is a significant reduction in tenants' reliance on
13 emergency room and acute medical services.⁴⁰ By shifting tenants away from
14 emergency inpatient treatment, permanent supportive housing puts its residents in a
15 better position to engage in more regular and less expensive outpatient and
16 preventative treatments. Finally, reliance on substance abuse treatment centers and
17 detoxification facilities significantly decreases for supportive housing participants.⁴¹

18 170. Defendant Shinseki recently acknowledged that permanent supportive
19 housing is a critical component of services that need to be available to seriously
20 disabled veterans so that they can access needed mental health and therapeutic

21

23 PERMANENT SUPPORTIVE HOUSING (2007), available at
<http://www.mainehousing.org/Documents/HousingReports/CostOfHomelessness.pdf> (finding 98
percent reduction in shelter visits among 99 tenants of Maine program).

24 ⁴⁰ See, e.g., Tia E. Martinez & Martha R. Burt, *Impact of Permanent Supportive Housing on*
25 *the Use of Acute Care Health Services by Homeless Adults*, 57 PSYCHIATRIC SERVICES 992 (2006)
(finding total number of emergency room visits for sample decreased by 56 percent and total
hospital admissions decreased by 44 percent).

26 ⁴¹ See THOMAS L. MOORE, ESTIMATED COST SAVINGS FOLLOWING ENROLLMENT IN THE
27 COMMUNITY ENGAGEMENT PROGRAM: FINDINGS FROM A PILOT STUDY OF HOMELESS DUALY
28 DIAGNOSED ADULTS (2006), available at
<http://documents.csh.org/documents/policy/PortlandCostStudy.pdf> (finding 93 percent decrease in
drug and alcohol treatment nights for residents of Oregon project).

1 services. He said, "Providing assistance in mental health, substance abuse treatment,
2 education and employment goes hand-in-hand with preventive steps and permanent
3 supportive housing." He continued, "We continue to work towards our goal of
4 finding every veteran safe housing and access to needed services." Furthermore, as
5 noted above, DVA recently acknowledged that permanent supportive housing is an
6 effective approach to ensuring homeless veterans with mental disabilities are able to
7 access the services they need to treat their conditions.

8
9 **Providing Permanent Supportive Housing through the WLA Campus**
10 **Is Especially Reasonable**

11 171. Providing permanent supportive housing to veterans who suffer from
12 serious mental disabilities or brain injuries is all the more reasonable within VA
13 GLA's service area for several reasons.

14 172. First, the WLA Campus has considerable available land and buildings
15 that could be adapted to provide permanent supportive housing. Dozens of buildings
16 on the WLA Campus are vacant or underutilized, and some of these buildings
17 formerly provided permanent housing to veterans. In fact, Defendant Beiter and
18 other VA GLA officials identified three buildings – Building 205, Building 206, and
19 Building 209 – as buildings that could be made available for some homeless housing.
20 Although VA GLA officials announced in June 2010 a \$20 million appropriation
21 from DVA to renovate Building 209, Defendant Beiter and other VA GLA officials
22 have taken no concrete steps to begin that project. Nor have they released any plans
23 related to the building design or identified the therapeutic approach or scope of
24 housing and supportive programming that would be offered if they do, in fact,
25 renovate Building 209. Additionally, they have taken no steps to recruit and hire
26 appropriate staff for such a facility. VA GLA officials have stated that the Building
27 209 renovation project would take at least four years, and VA GLA acknowledged in
28 January 2011 that VA GLA is "not commit[ed] to any specific project, construction

1 schedule, or funding priority” for the WLA Campus and that “[e]ach development
2 proposal must be approved individually by [Defendant Beiter], the [VISN Director],
3 and national VA officials.” VA GLA MASTER PLAN at 10.

4 173. Additionally, VA GLA recently announced Project 60, which is
5 modeled on the County of Los Angeles’ Project 50. As part of Project 60, VA GLA
6 will “collaborate with Federal, County and local government and non-profit agencies
7 to move 60 of the most vulnerable, chronically homeless Veterans off the streets and
8 into permanent supportive housing,” and Project 60 participants will get housing “no
9 matter how ready they are to receive mental health and substance abuse services – or
10 despite any treatment failures and setbacks.”⁴² Accordingly, Defendant Beiter does
11 not need to create a new program or substantially alter existing services to provide
12 permanent supportive housing as an accommodation for Plaintiffs and similarly
13 situated veterans.

14 174. Finally, the federal government acquired the land that now makes up the
15 WLA Campus under the 1888 Deed, and it is clear that the donors intended that the
16 government use the land to establish and permanently provide a *home* to disabled
17 veterans. Citizens donated the land precisely so that the federal government could
18 provide permanent housing and care for disabled veterans like Plaintiffs.

19
20 **Current Commercial Uses of the WLA Campus Preclude Use of that Land to**
21 **Provide Housing and Care for Plaintiffs and Other Seriously Disabled Veterans**

22 175. Beginning at least as early as 1989, VA GLA began leasing portions of
23 the WLA Campus to private entities and has since entered into a range of land use
24 agreements, including long- and short-term leases, memoranda of understanding,
25 revocable licenses, and enhanced sharing agreements, with both for-profit and not-
26 for-profit entities. Additionally, VA GLA transferred ownership of 13.5 acres to the

27 ⁴² VA GREATER LOS ANGELES HEALTHCARE SYSTEM, PROJECT 60 FACT SHEET, *available at*
28 http://www.losangeles.va.gov/documents/11-02-15_Fact-Sheet_Project_60.pdf (last accessed May
30, 2011).

1 State of California to construct the 396-bed geriatric care facility that the State now
2 operates on the WLA Campus. As of January 2011, VA GLA acknowledged 21
3 current land use agreements. *See* VA GLA MASTER PLAN at 36-37.

4 176. VA GLA's hospital complex is located on the southern portion of WLA
5 Campus. VA GLA has leased approximately 10 acres near the hospital to Enterprise
6 Rent-A-Car and Tumbleweed Transportation, a charter bus operator, for vehicle
7 storage. Since 2001, VA GLA also has allowed Westside Services, LLC to operate
8 parking areas throughout the WLA Campus as remote parking sites for nearby
9 businesses. The American Red Cross has a 50-year lease on a parcel of land near the
10 hospital and has operated its district headquarters there since 1989.

11 177. Large sections of the central portion of the campus are also unavailable
12 for veteran housing or services as a result of private land use agreements.
13 For example, Sodexo Marriott operates a laundry facility in Building 224 and an
14 adjacent water softening unit for processing linen from surrounding hotels.
15 Richmark Entertainment contracted with VA GLA to operate the Wadsworth Theatre,
16 which was built in 1939 as an entertainment center for veterans, and the Brentwood
17 Theater. Veterans are charged full price for all events held at those theaters. UCLA
18 utilizes the Jackie Robinson Baseball Stadium on the east side of the WLA Campus.
19 An energy company has operated active oil wells on approximately 2.5 acres since
20 1988, and 1.5 acres are subject to an enhanced sharing agreement with TCM, LLC to
21 operate a farmer's market. Additional land on this portion of the campus is used by
22 Westside Services, LLC as remote parking for non-DVA programs.

23 178. In the northern area of the campus, the overwhelming majority of land
24 is unavailable for use by veterans or by VA GLA to provide services or housing to
25 veterans as a result of private land agreements. The City of Los Angeles built
26 Barrington Park, a 12-acre property that includes a parking lot, a baseball diamond,
27 athletic fields, and a dog park. Brentwood School utilizes 20 acres, on which it has
28 constructed athletic fields, a track, tennis courts, and a swimming pool, under an

1 enhanced use agreement. Two soccer clubs use MacArthur Field, where veterans
2 once played softball, and an adjacent parking lot.

3 179. These uses are plainly inconsistent with the intent of the 1888 Deed that
4 the federal government establish and permanently maintain a home for disabled
5 veterans, because they are not directly related to providing housing or medical and
6 other therapeutic care to disabled veterans.

7 180. Despite repeated efforts by Plaintiff Barrie and her family and several
8 veteran, community, and philanthropic groups to obtain information about these land
9 deals, there has not been a public accounting of how these deals were reached, what
10 their details are, how much revenue is generated by them, and how such revenue, if
11 any, is used. In fact, the total fiscal year budget reported in VA GLA's 2010 Annual
12 Report has an asterisk next to it, indicating that the figure does not include
13 "alternative revenue."

14 181. Additionally, when DVA transferred the land to the State of California
15 for the operation of the nursing care facility, the deed included a provision specifying
16 that title would revert to the federal government if the State ceased using the land as
17 a nursing home or for domiciliary purposes. VA GLA characterized this provision
18 as requiring the State of California to use the land "as a nursing home or for
19 domiciliary uses, as agreed upon in the original deed." VA GLA MASTER PLAN at 10.
20 Even though VA GLA blatantly uses portions of the WLA Campus for purposes
21 plainly inconsistent with the original 1888 Deed, DVA imposed on the State of
22 California the obligation to use the parcel transferred to it consistent with the original
23 intent, at the risk of losing title to the land.

24
25 **Defendants Shinseki and Beiter Have Personal Knowledge that VA GLA's**
26 **Current Practices Are Discriminatory and that the WLA Campus Is Being**
27 **Misused and the Direct and Specific Authority to Remedy the Violations**

28 182. Defendant Shinseki has personal knowledge about the chronic

1 homelessness crisis among veterans. For example, numerous news accounts reflect
2 that in November 2009 Defendant Shinseki acknowledged the serious problem of
3 homelessness among veterans, and in particular among veterans recently returned
4 from Iraq and Afghanistan. Additionally, in 2010, the U.S. Interagency Council on
5 Homelessness (USICH), of which Defendant Shinseki is a member, released a report
6 on homelessness. The report included a discrete section on veteran homelessness,
7 which included quotes from Defendant Shinseki. That section of the report
8 described the number of homeless veterans and the number of chronically homeless
9 veterans and acknowledged that veterans were overrepresented in the homeless
10 population. Defendant Shinseki also issued a press release in February 2011
11 announcing that DVA and the U.S. Department of Housing and Urban Development
12 had released a supplement to a 2009 report to Congress on homeless, and that report
13 included substantial data on the number of homeless veterans and chronically
14 homeless veterans in the United States.

15 183. Defendant Shinseki also has personal knowledge about the necessity of
16 permanent supportive housing for this population to meaningfully access the VHA
17 services to which they are entitled. For example, when DVA and the U.S.
18 Department of Housing and Urban Development released the supplement to the 2009
19 report to Congress on homeless in February 2011, Defendant Shinseki stated,
20 "Providing assistance in mental health, substance abuse treatment, education and
21 employment goes hand-in-hand with preventive steps and permanent supportive
22 housing." He continued, "We continue to work towards our goal of finding every
23 veteran safe housing and access to needed services." Additionally, the 2010 USICH
24 report noted that, "[l]ike other populations, the complexity of navigating systems
25 makes it difficult for Veterans to get their needs met," and that "[v]eterans
26 experiencing chronic homelessness benefit from . . . increasing access to permanent
27 supportive housing."

28 184. Defendant Shinseki and his predecessors as Secretary of DVA have also

1 received dozens of letters over the years drawing attention to DVA's failure to
2 provide appropriate services at the WLA Campus to homeless veterans suffering
3 from mental disabilities, as well as the misuse of the WLA Campus. For example,
4 local veterans groups and activists have sent Defendant Shinseki dozens of letters
5 demanding appropriate housing and services for disabled veterans on the WLA
6 Campus. In fact, Defendant Shinseki received correspondence from local veteran
7 and activist Robert Rosebrock in December 2010 that not only addressed the misuse
8 of land at the WLA Campus, but also specifically mentioned one homeless veteran's
9 circumstances and his need for stable housing in order to meaningfully access
10 services at the WLA Campus. Additionally, in January 2011, the law firm Dilworth
11 Paxson LLP sent Defendant Shinseki a letter and a detailed report prepared by the
12 Metabolic Studio regarding the history of the WLA Campus and noting DVA's
13 breach of its fiduciary obligation under the 1888 Deed. The General Counsel for
14 DVA responded shortly thereafter with a letter contending DVA was fulfilling its
15 obligations under the 1888 Deed. Plaintiff Barrie also has sent numerous letters to
16 Defendant Shinseki's predecessors regarding VA GLA's misuse of the WLA
17 Campus for purposes unrelated to providing housing or supportive services to
18 disabled veterans and received at least one response from the Office of the Secretary
19 of DVA.

20 185. Defendant Shinseki, as Secretary of DVA, also has authority to
21 promulgate regulations that guide DVA's and VA GLA's development and
22 implementation of programs, including VHA benefits. Although aware that
23 homeless veterans with serious mental disabilities and brain injuries cannot
24 meaningfully access medical, mental health, and other services available under the
25 VHA benefits program, Defendant Shinseki has not promulgated regulations
26 requiring that DVA or its health systems, including VA GLA, provide permanent
27 supportive housing as a reasonable accommodation.

28 186. Thus, as a cabinet-level secretary with responsibility for ensuring DVA

1 complies with federal anti-discrimination laws and its fiduciary obligations,
2 Defendant Shinseki has specific knowledge of the violations detailed in this
3 Complaint and direct responsibility and authority to provide the remedies sought in
4 this Complaint, but he has failed to exercise that authority.

5 187. Defendant Beiter has personal knowledge that VA GLA serves
6 numerous veterans who suffer from serious mental disabilities and are homeless. As
7 Director of VA GLA, Defendant Beiter is responsible for ensuring that VA GLA
8 complies with all DVA regulations and policies, including the requirements that it
9 convene an annual meeting with community partners to assess the need for services
10 to homeless veterans and that it provide survey results to DVA on the homeless
11 population within its service areas annually. Defendant Beiter authorized VA GLA
12 to release its 2009 homelessness survey results, which reflected that more than 8,000
13 homeless individuals resided within VA GLA's service area.

14 188. Defendant Beiter has personal knowledge that homeless veterans within
15 VA GLA's service area are denied meaningful access to the services currently
16 offered by VA GLA. For example, officials from the City of Santa Monica have met
17 with Defendant Beiter and other senior VA GLA officials on numerous occasions
18 and argued that VA GLA is failing to provide homeless veterans who reside within
19 the geographic limits of Santa Monica with meaningful access to VHA services.

20 189. Additionally, VA GLA prepared and published a report on January 11,
21 2011 that purported to summarize the history and current scope of services offered
22 by VA GLA for homeless veterans. This report acknowledged "there is a sub-
23 population of Veterans who have serious chronic mental health and substance abuse
24 problems: these Veterans require intensive treatment beyond the scope current
25 homeless transitional housing programs." The report further acknowledged that VA
26 GLA did not currently offer any programs that meet the needs of this group. As the
27 Director of VA GLA, Defendant Beiter has final authority to approve the preparation
28 and release of reports such as the January 11, 2011 homelessness report and is aware

1 of the contents of that report.

2 190. VA GLA also recently launched Project 60. Through this initiative, VA
3 GLA plans to target 60 vulnerable, chronically homeless veterans and connect them
4 with permanent supportive housing, including the supportive resources and services
5 necessary to stabilize and improve medical and mental health. The impetus behind
6 the development and planned implementation of Project 60 was the recognition that
7 chronically homeless veterans cannot meaningfully access services offered by VA
8 GLA. As the Director of VA GLA, Defendant Beiter has final authority to authorize
9 initiatives like Project 60 and is aware of the factors that prompted VA GLA to
10 develop Project 60.

11 191. Defendant Beiter's official duties require that she oversee and manage
12 day-to-day operations of VA GLA, including approving program design, authorizing
13 VA GLA to offer particular services, establishing admission and other criteria for the
14 various programs offered through VA GLA, and ensuring that DVA complies with
15 federal anti-discrimination laws and its fiduciary obligations. She has, in fact,
16 approved and authorized the programs and services currently offered by VA GLA
17 and is the sole official within VA GLA with authority to approve new programs, to
18 set funding priorities, and to authorize modifications to existing programs that
19 require renovation or modification of existing structures. *See* VA GLA MASTER
20 PLAN at 10. Thus, Defendant Beiter has direct control over and responsibility for the
21 design and implementation of the current VHA benefits program offered through VA
22 GLA and has elected not to offer permanent supportive housing to Plaintiffs and
23 similarly situated veterans as a reasonable accommodation for their disabilities.

24 192. As the Director of VA GLA, Defendant Beiter is also personally aware
25 of the many contracts and land deals under which private entities utilize the WLA
26 Campus, where her office is located, for purposes inconsistent with the 1888 Deed.
27 The Veterans Programs Enhancement Act of 1998 required that VA GLA develop a
28 master land use plan for the WLA Campus. In January 2011, VA GLA released a

1 draft master plan, as required by the 1998 legislation. As the Director of VA GLA,
2 Defendant Beiter was involved in and had direct responsibility to review and
3 authorize the release of the draft master plan.

4 193. The draft master plan included a summary of the history of the WLA
5 Campus, including the 1888 Deed, and acknowledged that the 1888 Deed required
6 that the land be used for housing disabled veterans. *See VA GLA MASTER PLAN* at
7 10 (noting use of the land “as a nursing home or for domiciliary uses [was] agreed
8 upon in the original deed”). The draft master plan also documented the many private
9 land deals that limit VA GLA’s ability to use the WLA Campus to provide housing
10 and supportive services to disabled veterans. *See VA GLA MASTER PLAN* at 36-37
11 (summarizing “Current Land Use Agreements”).

12 194. Defendant Beiter has also received correspondence from local activists
13 detailing the many current uses of the WLA Campus that are inconsistent with the
14 1888 Deed. She also has been confronted by City of Santa Monica officials
15 regarding the private land deals and her failure to ensure that the WLA Campus is
16 used to provide housing to disabled veterans consistent with the 1888 Deed.

17 195. As the Director of VA GLA, Defendant Beiter has final decision-
18 making authority related to uses of the WLA Campus. *See VA GLA MASTER PLAN*
19 at 10 (“Each development proposal [for the WLA Campus] must be approved
20 individually by the GLAHS Director [Defendant Beiter], the [VISN director], and
21 national VA officials as required by VA regulation governing the specific project.”).
22 She and her predecessors as Director of VA GLA approved each land deal for the
23 WLA Campus described in this Complaint.

24 196. Accordingly, Defendant Beiter has specific knowledge of the violations
25 detailed in this Complaint, she or her predecessors as Director of VA GLA were
26 directly responsible for and authorized the conduct that gave rise to the violations
27 detailed in this Complaint, and she has the direct responsibility and authority to
28 provide the relief sought in this Complaint.

197. The violations of Plaintiffs' rights by Defendants outlined above are ongoing and will continue unless this Court grants the relief Plaintiffs seek in this Complaint.

CLASS ALLEGATIONS

198. Plaintiffs Valentini, Moraru, Doe, and Romine bring the first and second causes of action detailed below on behalf of themselves and all other persons similarly situated pursuant to Federal Rule of Civil Procedure 23. For those causes of action, those Plaintiffs seek injunctive and declaratory relief applicable to members of the Plaintiff Class, as defined below.

199. The plaintiff class consists of:

Veterans who are eligible for the benefits provided by the Veterans Health Administration and reside within the service area of the VA Greater Los Angeles Healthcare System, and who suffer from a mental disability and/or brain injury that renders them unable to obtain or maintain stable housing.

200. Class action status for this litigation is proper because:

(a) The plaintiff class is so numerous that joinder of all members is impractical;

(b) There are questions of law and fact common to the class;

(c) Plaintiffs' claims are typical of the claims of the class, in that

Plaintiffs are and were denied meaningful access to VHA benefits offered by VA GLA solely by reason of their serious mental or physical disability;

(d) Plaintiffs will fairly and adequately protect the interests of the class as there is no conflict between Plaintiffs and the other class members; and

(e) Plaintiffs can adequately represent the interests of the class members and have retained counsel experienced in class action litigation.

201. Defendants have acted and/or refused to act on grounds generally applicable to the class, thereby making final declaratory and injunctive relief

1 appropriate with respect to the class as a whole, under Federal Rule of Civil
2 Procedure 23(b)(2).

3
4 **FIRST CAUSE OF ACTION**

5 **Violation of Section 504 of the Rehabilitation Act of 1973, 29 U.S.C. § 793**

6 **(Intentional Discrimination)**

7 **(Plaintiffs Valentini, Moraru, Doe, Romine, and Vietnam Veterans of America**
8 **Against All Defendants)**

9 202. Plaintiffs incorporate by reference the foregoing paragraphs of this
10 Complaint as though fully set forth herein.

11 203. Plaintiffs are disabled within the meaning of the Rehabilitation Act and
12 otherwise eligible for the VHA benefits offered by DVA, a federal agency, but
13 defendants have intentionally defined and provide the VHA benefits offered by VA
14 GLA so as not to serve Plaintiffs' severe disabilities, in violation of Section 504 of
15 the Rehabilitation Act of 1973.

16
17 **SECOND CAUSE OF ACTION**

18 **Violation of Section 504 of the Rehabilitation Act of 1973, 29 U.S.C. § 793**

19 **(Meaningful Access)**

20 **(Plaintiffs Valentini, Moraru, Doe, Romine, and Vietnam Veterans of America**
21 **Against All Defendants)**

22 204. Plaintiffs incorporate by reference the foregoing paragraphs of this
23 Complaint as though fully set forth herein.

24 205. Plaintiffs are disabled within the meaning of the Rehabilitation Act and
25 otherwise eligible for the VHA benefits offered by DVA, a federal agency, but
26 defendants have defined and provide the VHA benefits offered by VA GLA in a way
27 that effectively denies Plaintiffs meaningful access to those benefits, in violation of
28 Section 504 of the Rehabilitation Act of 1973.

1
2 **THIRD CAUSE OF ACTION**

3 **Breach of Fiduciary Duty as Trustee of Charitable Trust (Injunctive Relief)**
4 **(All Plaintiffs Against All Defendants)**

5 206. Plaintiffs incorporate by reference the foregoing paragraphs of this
6 Complaint as though fully set forth herein.

7 207. The 1888 Deed created a charitable trust, and, as the successor-in-
8 interest to the National Soldiers' Home, DVA holds that land, on which the WLA
9 Campus now sits, in trust for the intended beneficiaries of the charitable trust,
10 disabled veterans, and must use the land only for purposes that directly contribute to
11 the establishment and permanent operation of a home for disabled veterans.

12 208. By authorizing the many uses of the WLA Campus that do not directly
13 contribute to the operation of a home for disabled veterans, Defendants have
14 breached their fiduciary duties as trustees of the charitable trust.

15
16 **FOURTH CAUSE OF ACTION**

17 **Accounting for Profits**

18 **(All Plaintiffs Against All Defendants)**

19 209. Plaintiffs incorporate by reference the foregoing paragraphs of this
20 Complaint as though fully set forth herein.

21 210. The 1888 Deed created a charitable trust, and, as the successor-in-
22 interest to the National Soldiers' Home, DVA holds that land, on which the WLA
23 Campus now sits, in trust for the intended beneficiaries of the charitable trust,
24 disabled veterans, and must use the land only for purposes that directly contribute to
25 the establishment and permanent operation of a home for disabled veterans.

26 211. By authorizing the many uses of the WLA Campus that do not directly
27 contribute to the operation of a home for disabled veterans, Defendants have
28 breached their fiduciary duties as trustees of the charitable trust, and the financial

1 arrangements and payment structure from these uses are complicated and the
2 information about them is within the control of the defendant, such that an
3 accounting is necessary.

4 5 **FIFTH CAUSE OF ACTION**

6 **Breach of Fiduciary Duty as Trustee of Charitable Trust (Mandamus Relief)** 7 **(All Plaintiffs Against All Defendants)**

8 212. Plaintiffs incorporate by reference the foregoing paragraphs of this
9 Complaint as though fully set forth herein.

10 213. The 1888 Deed created a charitable trust, and, as the successor-in-
11 interest to the National Soldiers' Home, DVA holds that land, on which the WLA
12 Campus now sits, in trust for the intended beneficiaries of the charitable trust,
13 disabled veterans, and must use the land only for purposes that directly contribute to
14 the establishment and permanent operation of a home for disabled veterans.

15 214. As trustees of the charitable trust, Defendants have a non-discretionary
16 fiduciary duty, which they have breached by authorizing the many uses of the WLA
17 Campus that do not directly contribute to the operation of a home for disabled
18 veterans.

19 215. Plaintiffs have no adequate remedy at law to compel defendants to cease
20 breaching their fiduciary duty as trustees of the charitable trust.

21 22 **REQUEST FOR RELIEF**

23 Plaintiffs therefore respectfully request that this Court grant the following
24 relief:

25 A. Certify a class for the first and second causes of action in this Complaint
26 pursuant to Federal Rule of Civil Procedure 23, in accordance with the allegations in
27 this Complaint and the forthcoming class certification motion.

28 B. Enter an injunction directing that Defendants provide Plaintiffs and the

1 Plaintiff Class permanent supportive housing as a reasonable accommodation for
2 their disabilities so Plaintiffs and the Plaintiff Class can reasonably access the VHA
3 benefits for which they are eligible.

4 C. Enter an injunction prohibiting Defendants from utilizing the WLA
5 Campus for any purpose that is not directly related to providing a home for disabled
6 veterans or, in the alternative, enter an order mandating that defendants refrain from
7 allowing the current uses of the WLA Campus for purposes that are not directly
8 related to providing a home for disabled veterans to continue.

9 D. Enter an injunction requiring an accounting of profits of all money
10 received by DVA or VA GLA as a result of land use agreements for the WLA
11 Campus under which the land is used for any purpose that is not directly related to
12 providing a home for disabled veterans and requiring that Defendants deposit all
13 such money in account to be used solely for the purpose of providing housing and
14 housing-connected supportive services to disabled veterans at the WLA Campus.

15 E. Declare that the design and implementation of the VHA benefits
16 program within VA GLA by defendants intentionally discriminates against Plaintiffs
17 and the Plaintiff Class solely by reason of their disabilities.

18 F. Declare that defendants are denying Plaintiffs and the Plaintiff Class
19 meaningful access to the VHA benefits offered by VA GLA solely by virtue of their
20 disabilities.

21 G. Declare that the federal government's acceptance of the land transferred
22 under the 1888 Deed created a charitable trust.

23 H. Declare that defendants have breached and continue to breach their
24 fiduciary duties as trustees of the charitable trust by allowing VA GLA to use the
25 WLA Campus for purposes that are not directly related to providing a home for
26 disabled veterans.

27 I. Grant such other relief as this Court deems just and proper, including
28 but not limited to awarding attorney's fees under 29 U.S.C. § 794a and any other

1 applicable statutes and awarding costs under 28 U.S.C. § 1920 and any other
2 applicable statute.
